

TotalShiftLeft and RealTestData Partner to Deliver Secure, Production-like Test Data for Faster Test Automation.

REALTESTDATA

WE'RE PROUD TO PARTNER WITH TOTAL SHIFT LEFT.

We're excited to partner with Real Test Data to accelerate modern software quality. Secure, compliant, production-like data has long been a limiting factor in effective automation – and together, we are solving this at scale. By combining Real Test Data's capabilities with Total Shift Left's shift-left strategy, we help enterprises accelerate delivery, strengthen compliance, and raise quality standards without compromising data integrity, enabling teams to innovate faster and release with confidence.

Central Bohemian, Czech Republic Feb 2, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Real Test Data s.r.o., a leader in desktop test data generation, today announced a strategic partnership with Total Shift Left, a premier provider of QA Consulting and and Automation Product and Services. This collaboration combines Real Test Data's innovative technology with Total Shift Left's extensive network to deliver faster, more efficient test data solutions to clients. This alliance will significantly improve test data experience and set a new standard for test data generation.

About RealTestData:

RealTestData provides realistic, consistent, privacy-safe test data on demand. RealTestData is a desktop synthetic test data generator for Windows, macOS, and Linux. It creates simulated but highly realistic datasets for software testing, offline and GDPR-safe. The solution emphasizes referential integrity and local realism, including country-specific data formats.

About TotalShiftLeft

Total Shift Left is a modern Quality Engineering company challenging traditional QA models by moving testing, automation, and quality practices to the earliest stages of software development. Through its Shift-Left-as-a-Service approach, the company helps organizations release faster, reduce risk earlier, and build resilient software from day one.

With expertise spanning automation strategy, API and enterprise application testing, and AI-enabled quality solutions, Total Shift Left partners with enterprises to modernize QA operations, strengthen governance and compliance, and deliver scalable, high-quality digital systems.
