

UbiGrowth Advances AI-Driven Roll-Up Strategy with New Strategic Acquisition

Platform Combines Private Equity Discipline and Artificial Intelligence to Modernize and Scale Service Businesses Through Automation, Revenue Intelligence, and Repeatable Integration Playbooks

Frisco, Texas Feb 6, 2026 ([Issuewire.com](https://www.issuewire.com)) - FOR IMMEDIATE RELEASE UbiGrowth AI, the AI Operating System for Service Companies, Acquires Silk Labs

UbiGrowth AI, the AI Operating System that enables service companies to scale with operator-independent automation, today announced the acquisition of Silk Labs, creator of SILK, an AI-powered product intelligence platform that unifies product knowledge, documentation, and competitive insights into a single, continuously updating system of record.

Terms of the transaction were not disclosed.

The acquisition strengthens UbiGrowth AI's position as the category-defining AI OS by integrating SILK's real-time context engine and unified knowledge infrastructure directly into the platform. The combined technology enhances reasoning, accelerates cross-functional execution, and streamlines operations across marketing, sales, finance, customer engagement, and backend workflows.

Strategic Rationale

- **AI OS + Product Intelligence:** SILK's centralized, continuously updated product intelligence enhances the contextual reasoning capabilities of UbiGrowth's multi-agent OS.
- **Unified Context → Faster Execution:** Teams gain shared visibility across product, marketing, sales, and operations, reducing lag, misalignment, and redundant effort.
- **Acceleration Across All Functions:** The combined platform improves execution velocity and decision quality for service companies adopting an AI-first operating model.
- **Margin Expansion:** By reducing manual dependencies and collapsing overlapping workflows, the integration strengthens the Company's margin-first operating framework.
- **Seamless Integration:** SILK's capabilities will be integrated into the UbiGrowth OS over the coming months to create a unified experience for all users.

Leadership Commentary

Bill Lupo, CEO, UbiGrowth AI

"Silk Labs built one of the most advanced product intelligence engines in the market. Bringing SILK into the UbiGrowth OS strengthens our mission to deliver the AI Operating System for service companies. This accelerates our roadmap and dramatically increases how fast our clients can scale."

Omid Reza Sedaghatian, Co-Founder, Silk Labs

“Our goal with SILK has always been to unify knowledge into something alive that teams can act on instantly. UbiGrowth shares that ambition. By combining our technologies, we are creating a platform where company knowledge, operational context, and multi-agent automation work as one system. This is a major step toward the next generation of intelligent operating models.”

Kevin Kuhl, Co-Founder, Silk Labs

“Bill impressed us early on with how UbiGrowth was already delivering real value to customers using AI technology available in today’s market. When we evaluated the stack we were building to support Product and Engineering teams, it became clear how powerful the combined platform could be. I’m excited to work alongside Bill and his team to build an AI-first platform that changes how teams see their work and collaborate.”

As part of the acquisition, Silk Labs co-founders Omid Reza Sedaghatian and Kevin Kuhl will join UbiGrowth AI in product and engineering leadership roles to help drive the next phase of the platform’s development.

About Silk Labs

Silk Labs is the creator of SILK, an AI-powered product intelligence platform that centralizes product knowledge, competitive insights, and documentation into a single source of truth. SILK helps teams move faster, collaborate effectively, and stay aligned.
