

Wellows Presents AI Search Visibility Platform Designed for Agencies and Startups

As AI-powered answers reshape discovery, Wellows helps agencies and startups track brand mentions, representation, and performance across AI search experiences.

Dubai, United Arab Emirates Feb 16, 2026 ([Issuewire.com](https://www.issuewire.com)) - Wellows today announced the launch of the [Wellows AI Search Visibility Platform](#), built for agencies and startups that need a clear view of how they appear across AI-driven search and answer engines.

As AI-generated answers increasingly influence buying decisions and brand discovery, teams face new operational questions: Where is the brand being referenced? Where is it missing? How does that representation shift over time? For agencies, the challenge expands to making AI visibility measurable and repeatable across multiple accounts and reporting cycles.

“Agencies and startups aren’t looking for another dashboard, they’re looking for confidence,” said **Masab Gadit, Founder and CEO of Wellows**. “That’s exactly what we set out to solve. Wellows helps them monitor AI visibility and turn insights into workflows that enable smarter planning, faster execution, and clearer reporting.”

What Wellows Helps Solve

- **Brand mention coverage in AI-generated answers:** See where brands appear, where they don’t, and how they’re described.
- **Outreach prioritization:** Identify visibility gaps and opportunities that inform outreach and content planning.
- **Agency reporting at scale:** Create repeatable client reporting without manual checks across multiple AI experiences.
- **Change tracking over time:** Compare historical visibility to understand performance direction and progress.

Key Launch Features

Here's a quick look at the [features](#):

- **Wellows Outreach:** Surfaces where brands are mentioned (and missing) in AI-generated answers so teams can prioritize outreach and content work.
- **Historical Performance Monitoring & Comparison:** Tracks AI visibility changes over time and supports comparisons across periods, clients, and categories.
- **Client Reporting:** Produces client-ready reporting for consistent updates across accounts.
- **Team Invites:** Enables collaboration by inviting colleagues and stakeholders into shared visibility and execution.
- **API & Integrations:** Connect to **Google Search Console**, automate reporting, and publish faster via **WordPress integration**.

Availability
