

Which company provides the best tree maintenance in Leicester?

Leicester, Leicestershire Feb 18, 2026 ([Issuewire.com](https://www.issuewire.com)) - At Leicester Tree Services, we are proud to care for trees across Leicester and the surrounding areas. We are a local team that understands how important trees are to homes, businesses, schools, and public spaces. Trees bring beauty, shade, privacy, and value to your property. They also need proper care to stay healthy and safe. Our goal is simple. We want to offer reliable, honest, and [high-quality tree care services in Leicester](#) using clear advice and fair prices. We work with homeowners, landlords, property managers, housing associations, and commercial clients. No job is too small or too large for our team, and we always begin with a free inspection so you can understand exactly what your trees need before any work begins.

We believe that good tree care starts with clear communication. When you contact Leicester Tree Services, we arrange a free inspection at a time that suits you. During this visit, we carefully look at your trees, listen to your concerns, and explain what work may be needed. We check for signs of disease, damage, overgrowth, weak branches, root problems, and safety risks. We also look at how the tree sits near buildings, fences, driveways, and power lines. After the inspection, we provide simple advice and a clear written quote. There is no pressure and no hidden costs. We want you to feel confident and informed before making any decision.

Tree pruning is one of our most common services. Pruning helps trees grow in a strong and healthy way. It removes weak, dead, or crossing branches and allows light and air to move through the canopy. This improves the tree's shape and reduces the risk of falling branches. Careful pruning can also protect nearby buildings and gardens. We use the correct tools and safe climbing methods to make clean cuts

that help the tree heal properly. Whether you need light shaping or more detailed crown work, we carry out pruning with care and respect for the tree.

We also offer crown reduction, crown thinning, and crown lifting. Crown reduction lowers the overall height and spread of a tree while keeping its natural shape. This is helpful when a tree has grown too large for its space or is blocking too much light. Crown thinning removes selected branches throughout the canopy to reduce weight and allow more light to pass through. Crown lifting removes the lower branches to create space beneath the tree for paths, driveways, gardens, or roads. Each method has its purpose, and during our free inspection we explain which option is best for your situation.

Tree removal is sometimes necessary when a tree is dead, dying, diseased, unsafe, or in the wrong place. Removing a tree is always a last option, and we only recommend it when there is no better solution. Our team is trained to remove trees safely and carefully, even in tight spaces. We plan every step before we start, considering nearby buildings, gardens, fences, and utilities. We use modern equipment and safe working practices to ensure the job is completed without damage to your property. Once the tree is removed, we clear all waste and leave the area tidy.

Stump grinding is another important service we provide. After a tree is cut down, the stump left behind can be unsightly and may cause problems. It can attract pests, become a tripping hazard, or get in the way of new planting or landscaping. Our stump grinding service removes the stump below ground level using specialist machinery. This allows the area to be reused for turf, plants, paving, or other landscaping plans. We work carefully to protect surrounding surfaces and clean up fully after the job is complete.

Hedge trimming and hedge reduction are also key services offered by Leicester Tree Services. Hedges need regular care to stay neat, healthy, and under control. Overgrown hedges can block light, grow into neighboring properties, and create access issues. Our team trims hedges to maintain a sharp and tidy look while keeping them healthy. We can carry out small shaping jobs or reduce large hedges that have grown too tall or wide. We always aim to leave hedges balanced and even, improving the overall look of your garden.

We understand that storms and strong winds can cause sudden damage. Fallen branches and damaged trees can be dangerous and stressful. That is why we offer emergency tree services. If a tree has fallen or a large branch is hanging dangerously, you can contact us for quick and safe assistance. We respond as soon as possible and work to make the area safe. After the immediate risk is removed, we can advise on further care or repairs needed to protect your property in the future.

Tree health inspections are another important part of our work. Trees can suffer from disease, pests, or poor soil conditions. Sometimes the signs are not easy to spot. During our free inspection, we look closely at leaves, bark, branches, and roots. We check for decay, fungus growth, cracks, and other warning signs. Early action can often save a tree and prevent larger problems later. We give simple advice on how to improve tree health, whether through pruning, soil care, or other treatments.

We also carry out tree planting services. Planting a new tree is a wonderful way to improve your garden or landscape. We can help you choose the right tree for your space, soil type, and long-term plans. Planting in the correct position and depth is very important for healthy growth. Our team prepares the ground properly and ensures the tree is supported while it establishes itself. We also provide advice on watering and aftercare so your new tree can grow strong and healthy for many years.

Site clearance is another service we offer to domestic and commercial clients. If you are preparing land

for building work, landscaping, or redevelopment, we can remove unwanted trees, shrubs, and vegetation. We plan site clearance carefully to ensure it is carried out safely and efficiently. Our team works with respect for the surrounding area and follows all safety guidelines. Once the clearance is complete, we remove debris and leave the site ready for the next stage of your project.

At Leicester Tree Services, safety is always our top priority. Tree work can be dangerous if not done correctly. Our team is trained, experienced, and fully equipped to handle every task safely. We use protective equipment, secure climbing systems, and well-maintained tools. We also carry full insurance for your peace of mind. Every job begins with a risk assessment to make sure we protect our team, our clients, and the public. We take pride in working carefully and responsibly at all times.

We care deeply about the environment. Trees are valuable not only for beauty but also for wildlife and air quality. Whenever possible, we look for ways to preserve and improve tree health rather than remove trees unnecessarily. We recycle green waste responsibly and aim to reduce our environmental impact. Wood and branches are processed and reused where possible. Our goal is to balance safety, property needs, and environmental care in every project we undertake.

Customer service is at the heart of everything we do. From the first phone call to the final clean-up, we aim to provide a smooth and friendly experience. We arrive on time, explain our work clearly, and treat your property with respect. We understand that inviting a team onto your property requires trust. That is why we focus on honesty, clear pricing, and high standards of work. Much of our business comes from repeat customers and recommendations, which shows the value we place on strong relationships.

Our free inspection service is one of the ways we support our customers. We believe you should not have to pay just to understand the condition of your trees. The inspection allows us to give professional advice and answer any questions you may have. It also gives you a chance to meet our team and see how we work. There is no obligation to proceed, and we are always happy to provide guidance even if you decide not to move forward right away.

We work across residential gardens, commercial sites, schools, parks, and public spaces throughout Leicester and nearby areas. Each site is different, and we adjust our approach to suit your needs. Whether you have a small garden tree that needs light pruning or a large commercial site that requires full management, we bring the same level of care and professionalism to every project. We understand local regulations and can advise if permissions are needed before work begins.

Choosing Leicester Tree Services means choosing a team that values quality, safety, and customer satisfaction. We do not rush jobs or cut corners. We take time to plan properly and complete work to a high standard. Our aim is to leave every site clean, safe, and improved. Healthy, well-managed trees can add beauty and value to your property for many years, and we are here to help you achieve that.

If you are unsure about the condition of your trees, worried about overgrown branches, planning a garden project, or dealing with storm damage, we are ready to help. Contact Leicester Tree Services today to arrange your free inspection. Our [experienced tree surgeons in Leicester](#) will visit your property, assess your needs, and provide clear advice and a straightforward quote. With our wide range of services, experienced team, and commitment to excellent customer care, you can trust us to handle your tree work safely and professionally from start to finish.
