

1Source Rentals Expands Climate Control Services to Wake Forest, NC, Enhancing Project Efficiency for Summer 2026

1Source Rentals Expands Climate Control Services to Wake Forest, NC, Enhancing Project Efficiency for Summer 2026

Wake Forest, North Carolina Mar 30, 2026 ([IssueWire.com](https://www.issuewire.com)) - 1Source Rentals, a leading equipment rental agency, has officially expanded its specialized [cooling equipment services](#) to the Holding Village area of Wake Forest, NC, just in time for the upcoming summer of 2026. This expansion aims to support local residential and commercial projects with efficient, reliable climate control solutions

during North Carolina's peak warm months.

As part of this strategic move, 1 Source Rentals will leverage its comprehensive range of climate control technologies to address the unique environmental challenges faced in the Holding Village community. Known for its robust inventory—from spot coolers to high-capacity 25-ton units—1 Source Rentals also emphasizes expert consultative services, providing clients with tailored solutions that ensure optimal environmental conditions for a variety of applications.

The services offered by 1 Source Rentals address critical challenges faced by projects transitioning into spring, such as managing high humidity levels and temperature fluctuations that can lead to condensation and structural risks. These solutions are particularly crucial in avoiding costly material failures and construction delays. By providing rental services that include dehumidifiers, air scrubbers, and ground thaw systems, 1 Source Rentals ensures that projects maintain momentum despite environmental interruptions.

"Our expansion into the Wake Forest area underscores our commitment to supporting our clients with high-quality climate solutions," said a spokesperson from 1 Source Rentals. "By understanding the specific needs of North Carolina's climates, we deliver targeted solutions that provide not just short-term relief, but long-term operational benefits."

Looking ahead, 1 Source Rentals aims to fortify its role as an indispensable partner in climate management. The company's mission to offer comprehensive, reliable rental solutions aligns with the objective of minimizing environmental risks and enhancing project efficiency across various regions. As they continue to grow, they pledge to adapt to evolving client needs with innovative, effective strategies.

Utilizing state-of-the-art technology like the Koldwave water-cooled units and high-capacity dehumidifiers, 1 Source Rentals addresses the technical demands of modern project settings where traditional ducting may not be possible. Their equipment is engineered for ease of installation, providing seamless integration into existing systems without extensive infrastructure modifications, which is vital in urban or densely built environments.

"The benefits of our advanced cooling and dehumidification units transcend beyond immediate needs," the spokesperson added. "By actively managing climate conditions, we protect project timelines and budgets, ensuring that our users gain maximum value and peace of mind."
