

360Disruption Launches 360FutureHealth, Ajman's New Health Innovation Hub

Strategically anchored in Ajman, the initiative combines local shareholder support with global innovation pathways to drive healthtech deployment and local manufacturing

Ajman, United Arab Emirates Mar 31, 2026 ([IssueWire.com](https://www.IssueWire.com)) - **360Disruption** today announced the launch of **360FutureHealth**, a new strategic initiative designed to position the Emirate of Ajman and the United Arab Emirates as a leading platform for health innovation, diagnostics, AI-enabled health, longevity, and life sciences partnerships across the UAE and the wider GCC.

Developed as a dedicated health innovation platform, 360FutureHealth will focus on incubating and accelerating regional market deployment, strategic partnerships, clinical innovation pathways, and the localization of advanced healthcare and diagnostic technologies.

The initiative is being activated through **360Pioneer FZE**, operating under the market-facing platform brand **360FutureHealth**, and is aligned with the UAE's long-term ambitions around advanced healthcare, local manufacturing, AI, and innovation-led economic growth.

The platform's execution model spans four core pillars:

- **Discover** – identifying global health innovators aligned with UAE priorities

- **Align** – connecting innovators with institutions, investors, and regulatory pathways
- **Deploy** – launching pilots, partnerships, and regional commercialization
- **Scale** – expanding across the GCC through strategic ecosystem growth

The initiative is being developed with the support of **strategic local shareholders and institutional stakeholders in Ajman**, reinforcing its alignment with the emirate’s long-term economic and health innovation ambitions.

Through this locally anchored shareholder structure, 360FutureHealth is positioned to accelerate regional partnerships, clinical deployment pathways, and selected local manufacturing opportunities for advanced healthcare and diagnostic solutions.

360FutureHealth is currently building an ecosystem of global innovators, institutional stakeholders, and regional deployment partners, with active work underway to support **local manufacturing and commercialization opportunities** for selected healthcare and advanced technology solutions.

The platform is being developed in close alignment with Ajman’s economic and innovation ambitions and will initially focus on creating a scalable health innovation ecosystem capable of supporting regional growth.

Dr. Anjo De Heus, Founder of 360Disruption, commented:

“360FutureHealth is designed to bridge global health innovation with local execution and regional impact. Our vision is to continue to build a platform that transforms innovation into measurable outcomes for Ajman, the UAE, and the wider GCC.”
