Electrical Contractors

Bronx, New York Mar 17, 2026 ([Issuewire.com](http://www.Issuewire.com)) - Anthony G. Ferry Inc led by owner Patrick Kennelly, continues to support electrical work across New York City through skilled service and steady project support. [AGF Electrical](#) works with contractors, property owners, and businesses that need a dependable electrician for construction projects, building upgrades, and system maintenance. Through

its service brand AGF Electrical, the firm handles electrical installations, repairs, and technical support for a wide range of buildings.

[Anthony G. Ferry](#) has served the electrical contracting field for decades. The company began operations in 1972 and has continued to grow by focusing on practical electrical work and clear communication with clients. Many contractors across New York City know the company as AGF Electrical. Some local builders also refer to the team as A Ferry's Electrical when discussing trusted electrical contractors for construction and building upgrades.

Anthony G. Ferry works on both commercial and residential projects. The company installs electrical systems in new construction and also upgrades wiring in existing buildings. Property owners often need system upgrades when buildings add new equipment or update lighting. In these situations, an experienced electrician reviews the building's power setup and determines the work required to support the new demand.

AG Ferry also supports construction teams during new building projects. Electrical work plays a central role during construction. Builders need electricians who can follow project plans and complete work according to schedule. The company studies electrical layouts, prepares wiring plans, and installs systems that support lighting, power distribution, and building equipment.

Patrick Kennelly guides the direction of [Anthony G. Ferry Inc.](#) He has worked in the electrical trade for more than thirty years and earned his Master Electrician license in 2001. Many people across the city recognize him as a knowledgeable NYC electrician who understands complex building systems. His experience helps the company maintain steady service across construction and maintenance projects.

Anthony G. Ferry supports projects that require detailed electrical planning. The company installs switchgear systems, generator connections, and fire alarm wiring for buildings that need dependable electrical support. These services often appear in commercial buildings where electrical systems must support lighting, safety systems, and operational equipment.

Anthony G. Ferry Inc also installs voice and data wiring as part of modern building infrastructure. Offices and retail spaces depend on reliable network connections. Contractors often request this work while completing construction or renovation projects. The AGF Electrical team coordinates with other trades to install wiring systems that support communication equipment and building operations.

Anthony G. Ferry works closely with property managers who oversee apartment buildings and office facilities. These buildings require regular electrical inspection and maintenance. A building manager may contact a NYC electrician when circuits show signs of overload or when lighting systems stop working properly. The company reviews the electrical panel, circuits, and connected equipment to identify the issue and complete the repair.

Anthony G. Ferry Inc also assists business owners who need electrical work completed during store openings or building upgrades. Retail spaces and restaurants often require lighting installations, power outlets, and equipment connections. A trained electrician from the company reviews the electrical setup and completes the installation according to building requirements.

Anthony G. Ferry Inc continues to support contractors working across New York City construction projects. Electrical systems must follow local code requirements and safety standards. Builders rely on experienced electricians to complete wiring and power distribution work before inspections take place. The AGF Electrical team prepares systems that meet these standards and support the needs of each

building.

Anthony G. Ferry also provides troubleshooting and repair services. Electrical problems can interrupt daily operations in businesses and residential buildings. A qualified electrician reviews the issue, identifies the source of the problem, and restores the system. This approach helps property owners return to normal operations without extended delays.

Anthony G. Ferry Inc remains active across multiple electrical service areas, including New York City, Westchester County, New Jersey, and Florida. Contractors and building owners across these regions contact the company when they need experienced electrical support for construction work or building upgrades.

Through AGF Electrical, the company continues to handle electrical systems that support modern buildings and business operations. Each project focuses on safe installation practices and careful attention to electrical code requirements.

Anthony G. Ferry continues its work under the guidance of Patrick Kennelly while supporting contractors, businesses, and property owners who require dependable electrical service. With decades of experience in electrical contracting, the company remains focused on practical electrical solutions that support construction and building operations across New York City.
