

# ASP-RCM Solutions Launches “Core Pulse” — An AI-Powered Autonomous Coding Platform

ASP-RCM Solutions Launches “Core Pulse” — An AI-Powered Autonomous Coding Platform to Transform Revenue Integrity and Accelerate Cash Flow

Dallas, Texas Mar 27, 2026 ([IssueWire.com](https://www.issuewire.com)) - [ASP-RCM Solutions](https://www.issuewire.com) Launches “Core Pulse” — An AI-Powered Autonomous Coding Platform to Transform Revenue Integrity and Accelerate Cash Flow

[ASP-RCM Solutions](https://www.issuewire.com), a leading provider of Revenue Cycle Management (RCM) services and AI-driven healthcare automation, today announced the launch of **Core Pulse**, its next-generation AI-powered autonomous coding and revenue intelligence platform.

Designed as a **coding-first, intelligence-led platform**, Core Pulse enables healthcare organizations to improve coding accuracy, prevent denials, and accelerate revenue realization through an integrated, automation-driven ecosystem.

As healthcare providers face increasing pressure from complex payer policies, rising denial rates, and workforce shortages, Core Pulse introduces a unified approach that transforms traditional coding and revenue cycle workflows into a proactive, data-driven system.

## A Coding-First Approach to Revenue Intelligence

Unlike conventional RCM solutions that treat coding as a standalone function, Core Pulse is built as a coding-centric platform that connects clinical documentation, compliance, billing readiness, and revenue

outcomes into a single intelligent workflow.

The platform leverages AI, machine learning, and real-time analytics to ensure every coded encounter is accurate, compliant, and optimized for reimbursement.

By transforming coding into a precision engine for revenue integrity, Core Pulse helps healthcare organizations eliminate upstream errors that lead to downstream denials and revenue leakage.

## Five Core Product Lines Powering Core Pulse

Core Pulse is structured across five integrated product lines, each designed to address critical gaps in coding and revenue performance:

- **Autonomous Coding Engine**
  - AI-powered coding across 38+ specialties, including complex and HCC charts
  - 95%+ coding accuracy with auditable precision
  - Reduced dependency on manual coding workflows
- **Clinical Documentation Intelligence (CDI)**
  - AI-driven clinical documentation improvement
  - Identification of missing diagnoses and documentation gaps
  - Enhanced coding accuracy and compliance
- **AI-Driven Compliance & Medical Necessity**
  - Real-time validation of clinical documentation against payer policies
  - ~95% accuracy in compliance and medical necessity checks
  - Prevention of denials due to documentation and coding gaps
- **Predictive Denial Intelligence**
  - Identification of denial risks before claim submission
  - Pattern-based analytics using historical payer data
  - 35–50% reduction in preventable denials
- **Coding-to-Revenue Optimization Layer**
  - Pre-submission claim readiness and error detection
  - Integration with billing and downstream workflows
  - 2–4× faster discharge-to-bill cycles

## Delivering Measurable Business Impact

Core Pulse is built to deliver measurable improvements across coding accuracy, revenue cycle performance, and financial outcomes.

Organizations leveraging ASP-RCM's platform have achieved:

- **95%+ coding accuracy across specialties**
- **70%+ reduction in pre-submission edits**
- **35–50% reduction in preventable denials**
- **2–4× faster discharge-to-bill cycles**

Additionally, integrated revenue intelligence capabilities enable:

- **20–30% reduction in AR days**
- **50%+ reduction in manual follow-ups**

- **Up to 12% net revenue lift identified**

These outcomes position Core Pulse as a strategic solution for healthcare organizations seeking to improve financial predictability and operational efficiency.

## Executive Commentary

**Suresh Padmanabhan, CEO of [ASP-RCM Solutions](#), said:**

"Healthcare organizations today are not just dealing with coding challenges—they are dealing with a lack of visibility into how coding impacts revenue outcomes.

With Core Pulse, we are redefining coding as the foundation of revenue integrity. By embedding intelligence at the coding level, we enable providers to prevent revenue leakage before it occurs and build a more predictable and efficient revenue cycle."

**Jatin Malhotra, Senior Vice President of [ASP-RCM Solutions](#), added:**

"What differentiates Core Pulse is its coding-first architecture combined with real-time intelligence.

We are not just automating coding—we are connecting coding decisions to financial outcomes. This allows healthcare organizations to improve accuracy, reduce denials, and accelerate cash flow in a measurable and scalable way."

## Addressing Critical Industry Challenges

Healthcare providers across the United States continue to face:

- Increasing denial rates driven by coding and documentation gaps
- Complex and evolving payer requirements
- Shortage of skilled coding professionals
- Revenue leakage due to upstream errors

Core Pulse addresses these challenges by enabling healthcare organizations to:

- Improve coding accuracy and compliance
- Prevent denials before claims are submitted
- Reduce manual coding dependency
- Accelerate reimbursement cycles
- Strengthen revenue visibility and control

## About ASP-RCM Solutions

[ASP-RCM Solutions](#) is a leading provider of Revenue Cycle Management services and AI-powered healthcare automation, serving hospitals, physician groups, and healthcare organizations across the United States.

The company delivers integrated, technology-enabled solutions that improve coding accuracy, reduce revenue leakage, and accelerate financial performance across the revenue cycle.
