

Backyard to Campsite: Apolosign Portable TVs Bring Entertainment Outdoors in 2026

Los Angeles, California Mar 30, 2026 ([IssueWire.com](https://www.issuewire.com)) - Apolosign today introduced two portable TVs designed for outdoor entertainment: the Apolosign 32-inch Portable TV and the Apolosign PackGo 27-inch Briefcase Portable TV. Developed for backyard gatherings, camping trips, and mobile lifestyles, the new models combine large-screen viewing, battery-powered portability, and flexible connectivity for users who want entertainment beyond the home.

The [Apolosign 32-inch Portable TV](#) is designed for users who want a larger screen for outdoor viewing. It features a 4K Ultra HD display and a built-in 15,000mAh battery for cord-free use in backyards, patios, and campsites. The model also includes a five-wheel stand intended to improve mobility across grass, deck surfaces, and other uneven outdoor areas.

The Apolosign PackGo 27-inch Briefcase Portable TV is built for users who prioritize portability and multifunctional use. Housed in a rugged briefcase-style form factor, it includes a [27-inch 1080p Full HD display](#), 10-point multi-touch support, built-in 40W speakers, and Android OS with access to the Google Play Store. Users can stream content directly, cast wirelessly through AirPlay, or connect external devices through HDMI.

A built-in battery supports up to 6 hours of use and also provides external charging capability for compatible devices such as smartphones, camping lights, and gaming devices. Additional ports,

including HDMI, USB-A, and USB-C, are designed to support a wide range of connectivity needs in outdoor and mobile environments.

“As outdoor lifestyles continue to evolve, consumers are looking for entertainment products that are easier to move, easier to power, and more adaptable to different settings,” said Olivia Bennett, Chief Product Officer at Apolosign. “With the 32-inch Portable TV and the [PackGo 27-inch Briefcase Portable TV](#), we wanted to create two solutions that support different outdoor experiences, from backyard viewing and outdoor movie nights to camping and road travel.”

The two products are intended to address different outdoor viewing scenarios. The 32-inch model emphasizes larger-screen 4K viewing and easier mobility for backyard and campsite use, while the PackGo focuses on compact transport, touch interaction, and reverse charging functionality for travel-oriented users.

As outdoor recreation, road travel, and backyard socializing continue to grow in 2026, Apolosign’s latest product launch reflects increasing demand for display devices that combine entertainment value with portability and off-grid practicality.

Both products are now available through the company’s official website at www.apolosign.com.

About Apolosign
