

## BOMB IRAN A New Political Thriller from Jack Wilson

Published by Dex System | Available Now

**Los Angeles, California Mar 30, 2026** ([IssueWire.com](http://IssueWire.com)) - Dex System Publishing, announces the release of *Bomb Iran*, a provocative new political thriller by bestselling author Jack Wilson. Available now across all major digital and print platforms, the novel arrives at a moment when the question at its center — how far will the West go to stop Iran's nuclear program — has never felt more urgent or more dangerous.

Jack Wilson's *Bomb Iran* is not a policy paper. It is a novel built in the war rooms, the back corridors, and the no-signal zones where decisions that rewrite the map get made. The book follows a fractured coalition of intelligence officers, military planners, and political fixers as they navigate the abyss between deterrence and destruction — and the point where one classified order ends the world as the region knows it.

"This is the scenario that keeps people awake," Wilson has said of the book. "Not because it's fantastical, but because the machinery for it already exists — and has for decades."

*Bomb Iran* joins a growing list of geopolitically charged titles from Dex System, the AM I AM imprint that has established a distinct voice in the intersection of global affairs, speculative narrative, and hard-edged realism. The imprint's recent releases have included *The War That Rewrote the Middle East* by Liam Conrad and *The 9/11 War: Inside the Secret Alliance Between Al-Qaeda and Iran*, cementing Dex System's reputation as the home for fiction and nonfiction that refuses to flinch.

Wilson's novel does not take sides. It takes readers inside the logic of catastrophe — the intelligence

assessments that miss by a fraction, the political calculations that harden into orders, the soldiers and spies who carry out decisions made by people who will never be in the room when it matters. The result is a book that reads like history written before it happens.

## PUBLICATION DETAILS
