

## Brace Central Orthodontics Introduces Advanced Digital Technology for Precision Orthodontic Care in Brooklyn

Brooklyn orthodontic practice enhances patient experience with modern digital scanning and personalized orthodontic treatment solutions.

**BRACECENTRAL**  
Practice Dedicated to Orthodontics

**New York City, New York Mar 4, 2026 ([Issuewire.com](https://www.Issuewire.com))** - Brace Central Orthodontics, a leading orthodontic practice located in Brooklyn, New York, is expanding its commitment to patient-focused care by integrating advanced digital technology designed to improve treatment precision, comfort, and efficiency. The practice, led by board-certified orthodontist [Dr. Polina Ingberman](#), continues to bring

modern orthodontic solutions to patients seeking braces, Invisalign, and comprehensive orthodontic treatment in Brooklyn.

With more than two decades of experience in orthodontics, the team at Brace Central Orthodontics combines clinical expertise with modern diagnostic tools to create personalized treatment plans for children, teens, and adults. The introduction of advanced digital scanning technology allows the practice to design more accurate treatment plans while improving comfort for patients during the diagnostic process.

Traditional orthodontic impressions often required bulky molds that many patients found uncomfortable. With the implementation of modern digital scanners, Brace Central Orthodontics can now capture detailed 3D images of a patient's teeth and bite. These high-resolution images allow orthodontists to analyze alignment issues more precisely and plan customized treatment strategies that support healthier, more confident smiles.

"Technology has transformed the way orthodontic care is delivered," said Dr. Polina Ingberman, founder of Brace Central Orthodontics. "Digital scanning and advanced imaging allow us to evaluate each patient's needs with greater precision while improving their overall experience in the office. Our goal is always to combine expertise with innovation so our patients receive the highest quality orthodontic care possible."

[Brace Central Orthodontics](#) offers a full range of orthodontic treatments designed to address both cosmetic and functional dental concerns. Among the most popular options available at the Brooklyn practice are modern metal braces, ceramic braces, and Invisalign clear aligners. Each treatment option is designed to correct issues such as crowding, spacing, overbites, underbites, and other orthodontic conditions.

Invisalign, one of the most requested orthodontic treatments among adult and teen patients, uses a series of custom-made clear aligners to gradually reposition teeth. As an Invisalign Platinum Provider, Brace Central Orthodontics has successfully treated hundreds of cases using aligner technology. The removable design of Invisalign aligners allows patients to eat, brush, and floss normally while maintaining a discreet orthodontic treatment option.

For patients who prefer traditional orthodontic solutions, braces remain one of the most reliable and effective methods for correcting misaligned teeth and bite issues. Advances in orthodontic materials and design have made modern braces smaller, more comfortable, and more efficient than in previous decades. These improvements allow orthodontists to deliver excellent results while minimizing treatment discomfort.

Beyond technology and treatment options, Brace Central Orthodontics places a strong emphasis on personalized patient care. The team works closely with each patient to understand their goals, lifestyle, and oral health needs before designing a customized orthodontic treatment plan. This approach helps ensure that every patient receives care tailored specifically to their situation.

Patients visiting the Brooklyn orthodontic clinic are treated in a welcoming, family-friendly environment designed to make orthodontic care accessible and comfortable. The practice provides orthodontic treatment for patients of all ages and offers flexible appointment scheduling to accommodate busy family and work schedules.

The clinic is conveniently located at [2468 Coney Island Avenue](#) in Brooklyn, serving communities

throughout southern Brooklyn including Gravesend, Sheepshead Bay, and surrounding neighborhoods. Its accessible location makes it a convenient choice for families searching for an experienced orthodontist in Brooklyn.

In addition to offering advanced orthodontic treatments, Brace Central Orthodontics is committed to ongoing education and staying current with the latest developments in orthodontic technology and techniques. By continuing to invest in modern tools and professional development, the practice aims to deliver consistent, high-quality orthodontic care to the Brooklyn community.

“Our mission is to help every patient achieve a healthy, confident smile,” Dr. Ingberman added. “We believe orthodontic care should be both effective and comfortable, and modern technology allows us to deliver that experience.”

New patients interested in orthodontic treatment, including [braces](#) or [Invisalign](#) consultations, can contact Brace Central Orthodontics to schedule a complimentary initial consultation and learn more about their treatment options.
