10,000 pixelated dogs inscribed on Dogecoin

In a world where everything feels
disposable, Doginal Dogs proves that

Arlington Heights, Illinois Mar 29, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Doginal Dogs, the largest NFT inscription project on the Dogecoin blockchain, has reached an all-time high floor price of \$4,152 — a 44,900% increase from its free mint origin in January 2024 — while blue-chip collections like Bored Ape Yacht Club continue to trade far below their peak valuations.

The 10,000-piece hand-curated pixel art collection has seen its floor price climb 73.7% in the past seven days alone, with \$5 million in 30-day trading volume. The project launched with no VC backing, no presale, and no entry cost to early adopters.

Unlike many NFT projects that rely on venture capital and speculative hype, Doginal Dogs built its community organically through daily X Spaces, real-world events, and a free entry policy that remains in place today.

“One Doginal Dog is enough to change your life,” said co-founder Christian “Bark” Barker. For more information visit doginaldogs.com
