

## Extrieve Technologies Honoured at Aegis Graham Bell Awards for AI-Driven Digital Transformation

Extrieve Technologies receives the Aegis Graham Bell Award for AI-driven digital transformation, recognising its intelligent document processing and enterprise automation platform.

**Noida, Uttar Pradesh Mar 5, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Enterprise document automation platform recognised for advancing intelligent workflow automation**

Extrieve Technologies Pvt. Ltd. has received the **Award of Excellence at the 16th Aegis Graham Bell Awards** for its innovation in digital transformation technologies.

The Aegis Graham Bell Awards, supported by the Ministry of Electronics and Information Technology (MeitY), Government of India, recognise organisations demonstrating innovation in artificial intelligence, telecom, fintech, and digital enterprise solutions.

Extrieve's AI-powered document automation platform helps organisations transition from legacy document systems to modern digital workflows. The platform integrates intelligent document capture, AI-based data extraction, automated workflows, and secure enterprise content management.

Through its AI-powered document automation platform, enterprises can digitise document-heavy

operations while maintaining regulatory compliance and operational transparency.

Businesses adopting intelligent document management solutions can significantly improve document processing efficiency, reduce operational errors, and accelerate decision-making across departments.

The complete announcement regarding this recognition can be viewed on the company's official newsroom:
