

Green Metrics Signs MoU with FAST India to Drive ESG Adoption in Rajasthan

Bengaluru, Karnataka Mar 24, 2026 ([IssueWire.com](https://www.issuewire.com)) - Green Metrics, an ESG-focused organization, has signed a strategic Memorandum of Understanding (MoU) with FAST India (Foundation for a Sustainable Tomorrow) to promote ESG adoption, sustainability reporting, and data-driven impact across the state of Rajasthan.

This collaboration aims to strengthen ESG data management, performance tracking, and transparent sustainability reporting using the Green Metrics platform. FAST India will act as a key outreach and facilitation partner, enabling engagement with industries, MSMEs, institutions, and government-linked stakeholders across Rajasthan.

The partnership will focus on conducting awareness programs, workshops, and capacity-building initiatives to drive ESG adoption and responsible business practices. It will also support organizations in aligning with global sustainability standards and improving compliance frameworks.

A key highlight of this collaboration is the exclusive partnership structure in Rajasthan, where FAST India will serve as the strategic outreach partner for promoting ESG solutions.

This initiative is expected to play a significant role in accelerating sustainability transformation in Rajasthan and enabling organizations to create measurable environmental and social impact.
