

## Healthy Sprays Seeking Partnerships With Qualified Compounding Pharmacies

THIN™  
SEMAGLUTIDE  
ORAL SPRAY

THIN™-R  
SEMAGLUTIDE  
ORAL SPRAY

THIN™-ST  
TIRZEPATIDE  
ORAL SPRAY

**Delray Beach, Florida Mar 11, 2026** ([Issuewire.com](http://Issuewire.com)) - [Healthy Sprays, LLC](http://HealthySprays.LLC) introduces its innovative oral spray platform designed specifically to support appetite suppression and long-term weight management — with a strategic focus on partnering directly with compounding pharmacies.

THIN™ is the first oral semaglutide spray for people who've used semaglutide and/or tirzepatide for weight loss and are ready for a maintenance plan that doesn't require needles, refrigeration and can be used anytime, on the go, as an appetite suppressant. There are three current versions, THIN™, THIN™-R and THIN™-ST available.

As patient demand for weight-loss therapies continues to grow, many individuals seek solutions that help maintain appetite control AFTER injectable therapy or provide a needle-free continuation option. Healthy Sprays' sublingual delivery system offers a convenient alternative that can be incorporated as part of a post-injection continuation protocol, helping patients sustain appetite suppression while improving comfort and adherence.

The company is actively building partnerships with compounding pharmacies nationwide, providing a

differentiated dosage form that complements existing injectable offerings. By integrating a spray-based semaglutide and/or tirzepatide option, pharmacies can expand their weight management portfolios, support prescribers with flexible therapy pathways, offer patients a seamless transition from injections to needle-free maintenance support and earn triple digit margins.

Compounding pharmacies interested in partnership opportunities can learn more at [healthysprays.com](http://healthysprays.com).
