

## HobbyScool Announces Eco-Creative Summit for Earth Day Week — April 21–22, 2026

Free Two-Day Virtual Summit Launching Earth Day Week Brings Together Expert Makers to Share Practical, Sustainable Crafting Techniques

# HobbyScool Announces April 2026 Eco-Creative Summit for Makers, Crafters, and Sustainable Living Enthusiasts

**Alpharetta, Georgia Mar 30, 2026 ([IssueWire.com](https://www.IssueWire.com))** - HobbyScool, an online creative education platform, has announced its upcoming Eco-Creative Summit, a two-day virtual event taking place April 21–22, 2026 — launching the day before Earth Day. The event is designed to help makers, crafters, and sustainability-minded individuals discover practical techniques for creating beautifully with natural and recycled materials — without complicated chemistry or specialist equipment.

The summit kicks off the day before Earth Day — a fitting backdrop for an event centered on sustainable creativity and eco-conscious making.

The Eco-Creative Summit brings together expert makers and textile artists to lead structured, hands-on sessions focused on sustainable crafting, upcycling, and eco-friendly creative practices. Workshops are designed for all experience levels and emphasize accessible, realistic techniques that can be incorporated into everyday creative life.

"Creative makers are increasingly looking for ways to craft more sustainably — but most resources either feel overwhelming or require specialist knowledge. The Eco-Creative Summit was created to change that. We want every attendee to walk away with practical techniques they can use right away, using materials they already have at home." — Dr. Destini Copp, Founder, HobbyScool

Workshops at the summit will explore a wide range of eco-creative techniques, including botanical printing, wet felting, natural dyeing, upcycling everyday materials, cold process soap making, slow-stitching and fabric mending, creating art from recycled packaging, and making professional-quality natural paints from earth pigments.

The summit will also feature an exclusive premium bonus bundle for VIP pass holders, including project guides, eBooks, on-demand classes, printable planners, and a \$12 gift card for sfwashi.com.

The Eco-Creative Summit is fully virtual, allowing participants to join from anywhere in the world. Registration is free, with an optional VIP All-Access Pass available for lifetime access to session replays and the premium bonus bundle.
