

Isikko Launches Travel Technology Platform to Power India's Travel Businesses

Delhi, India May 27, 2026 (Issuewire.com) - *Isikko*, a leading travel technology company in India, today announced the launch of its advanced, all-in-one travel technology platform designed to empower travel agencies, tour operators, and car rental businesses with scalable digital solutions.

As the Indian travel industry rapidly evolves, businesses are increasingly seeking automation, seamless booking systems, and global connectivity. *Isikko* addresses these needs by offering a comprehensive suite of solutions, including a B2B travel booking engine, self-drive car rental software, multi-currency support, and plug-and-play APIs.

“The travel industry is no longer just about bookings—it’s about speed, visibility, and control,” said [Founder Name], Founder of *Isikko*. “We are building technology that helps travel businesses not just survive, but scale faster in a highly competitive market.”

Bridging the Technology Gap in Travel

India’s travel and tourism sector is witnessing significant growth, yet many businesses still operate with outdated systems. *Isikko* aims to bridge this gap by providing modern, easy-to-integrate solutions that enable businesses to digitize operations without heavy technical investment.

The platform allows travel businesses to:

- Manage bookings, inventory, and pricing in real-time
- Access global travel content through API integrations
- Accept payments in multiple currencies
- Launch white-label booking platforms quickly
- Improve online visibility through integrated directory listings

Empowering Travel Businesses Across Segments

From startups to established enterprises, Isikko's flexible infrastructure supports a wide range of travel segments, including:

- Travel agencies and tour operators
- Self-drive and fleet rental companies
- Corporate travel providers
- Destination management companies

With a strong focus on user experience and scalability, the platform ensures that businesses can expand operations without worrying about technical limitations.

Driving Growth Through Visibility and Innovation

One of Isikko's key differentiators is its integrated travel business directory, which helps companies improve discoverability in search engines. By combining technology with visibility, [Isikko](#) enables businesses to generate leads while automating operations.

About Isikko
