LexTrack AI Collaborates with NVIDIA VC Alliance to Accelerate the Future of AI-Powered Social Platforms

The AI dating infrastructure company joins NVIDIA's global startup ecosystem to expand its "Dating as Infrastructure" platform and empower creators, communities, and businesses to launch niche dating apps at scale.

San Francisco, California Mar 18, 2026 (Issuewire.com**)** - **LexTrack AI Collaborates with NVIDIA VC Alliance to Advance "Dating as Infrastructure" for the AI Social Economy**

LexTrack AI, America's leading AI-powered dating infrastructure platform, today announced its collaboration with the NVIDIA VC Alliance, a global ecosystem connecting high-growth AI startups, venture capital firms, and industry innovators within the NVIDIA AI network.

Thanks to NVIDIA VC, the collaboration enables LexTrack AI to expand its mission of building the world's first "**Dating as Infrastructure**" ecosystem: an AI-powered platform that allows creators, communities, and businesses to launch and scale niche dating applications instantly.

Unlike traditional dating platforms that require full development cycles, LexTrack AI's infrastructure model enables users to **create, join, and operate customized dating ecosystems with a single click**, powered by AI-driven matchmaking, automation, and scalable cloud architecture.

Through its participation in the NVIDIA VC Alliance ecosystem, LexTrack AI gains access to one of the world's largest AI startup networks, which includes more than **30,000 emerging AI companies**, venture capital investors, and industry leaders.

The collaboration provides opportunities for:

- Participation in curated investor introductions and pitch events
- Collaboration with AI founders and ecosystem partners
- Access to advanced AI training and technical resources
- Engagement with NVIDIA experts and innovation programs

These resources will help accelerate the development of LexTrack AI's platform while strengthening its ability to scale AI-powered social applications globally.

"Dating platforms should not need to be rebuilt from scratch every time."

 - Nicolas Hunter He Tian, Founder of LexTrack AI.

"Our vision is to make dating a programmable infrastructure layer, similar to how cloud computing transformed software development. Through collaboration with the NVIDIA ecosystem, we can accelerate innovation and empower founders, investors, and communities to build AI-powered social ecosystems at a global scale."

LexTrack AI positions itself as **America's Top AI Dating Company**, with its flagship capability: **God Mode**, allowing users to instantly create and operate niche dating ecosystems across industries, communities, and interests.

By leveraging the NVIDIA VC Alliance ecosystem, LexTrack AI aims to expand its platform internationally while enabling founders, investors, and communities to explore new business models within the rapidly growing **AI-powered social discovery economy**.

About LexTrack AI
LexTrack AI is an AI-powered dating infrastructure platform that enables users, creators, and businesses to launch and scale niche dating applications instantly. Through AI automation, intelligent matchmaking, and cloud-scale architecture, LexTrack AI is building the future of social discovery through its "**Dating as Infrastructure**" model.
