

Managing Director Gershwin Johnson leads global medical supply network expansion at HaloMedix Global.

Strategic growth in international sourcing and distribution is strengthening the company's ability to supply hospitals and clinics across multiple regions.

Cape Town, Western Cape Mar 23, 2026 ([Issuewire.com](https://www.issuewire.com)) - HaloMedix Global strengthens international medical supply network under the leadership of Managing Director Gershwin Johnson

HaloMedix Global Pty Ltd, founded and led by **Managing Director Gershwin Johnson**, announced the continued expansion of its international medical supply distribution operations as the company increases support for hospitals, clinics, distributors, and institutional buyers across Africa and global markets.

Headquartered in Somerset West, Cape Town, **HaloMedix Global** focuses on the sourcing and distribution of certified medical equipment, surgical supplies, diagnostic products, and disposable healthcare consumables manufactured in compliance with international standards, including ISO, CE, and FDA requirements. The company works with verified manufacturers and approved suppliers to ensure consistent product quality and reliable delivery.

The company was established by **Johnson** to address supply chain gaps affecting healthcare providers that require dependable access to compliant medical products at competitive prices. The business model connects verified manufacturers with healthcare institutions through direct procurement, structured logistics, and controlled quality verification, allowing buyers to source products efficiently and securely.

HaloMedix Global supplies a wide range of healthcare products, including surgical masks, examination gloves, protective gowns, syringes, IV administration sets, diagnostic devices, surgical instruments, sutures, wound care materials, and general hospital consumables. The company supports both public-sector and private-sector procurement programs and works with distributors, medical wholesalers, and institutional buyers in multiple regions.

Johnson stated that the objective of **HaloMedix Global** is to build a stable international supply network that allows healthcare providers to secure essential medical products without delays caused by sourcing limitations, pricing instability, or inconsistent manufacturing standards. The company continues to develop supplier partnerships in Asia and other manufacturing regions while expanding distribution channels in Africa and additional international markets.

Industry observers note that demand for reliable medical supply distribution has increased in recent years as healthcare systems require stronger procurement structures, transparent sourcing processes, and dependable international logistics support.
