# Mango AI's AI Kissing Video Generator Makes Kiss Videos Accessible to All

Mango AI's newly launched AI kissing video generator allows users to generate realistic kiss videos with simple photo uploads—no editing skills required.

Hong Kong, Hong Kong S.A.R. Mar 23, 2026 (Issuewire.com**)** - Mango AI, renowned for its innovative AI-powered video tools, has launched an AI kissing video generator, designed to transform ordinary photos into lifelike, expressive kiss videos. This tool enables users to create high-quality romantic kiss scenes with ease and efficiency, bringing a new level of creativity and intimacy to digital content creation.

To get started, users simply choose a kiss type and upload a photo in formats such as JPG, JPEG, PNG, or WEBP. For the "Kiss Me AI" effect, a single photo of one person is enough, while for more intimate kiss types, such as a French kiss or a gentle peck, users upload a photo of two people. The AI kissing video generator then creates smooth kiss videos in minutes.

The generator relies on advanced AI algorithms to deliver high-quality results. It intelligently analyzes

facial features, positions, and orientations in the uploaded photo. This creates fluid animations, including synchronized lip movements, gentle head tilts, subtle smiles, and natural expression changes that match the selected kiss type.

Once the kiss video is generated, users can easily download it in high-definition MP4 format. The video can also be shared across social media platforms, messaging apps, or used in professional projects. This feature makes it easy for users to share these moments with loved ones, express affection, or create engaging content for storytelling.

The AI kissing video generator supports a range of applications. It provides a unique way for long-distance couples to share moments of affection, offering emotional comfort when they are apart. Creators and marketers also find value in the tool, using it to produce engaging content for social media or advertising campaigns that emphasize emotional connections.

"Our AI kissing video generator empowers users of all skill levels to create convincing AI kiss videos effortlessly," said Winston Zhang, CEO of Mango Animate. "Beyond this tool, we've also introduced a range of other robust tools, including an AI face swap video maker, an image to image generator, and an AI pet podcast creator, to name just a few."
