

Mark Shelton of Pure Business Capital Launches High-Income Remote Agent Program for Shelf Corporations and Loans

Pure Business Capital, founded and led by Mark Shelton, today announced the expansion of its remote agent and partner program, offering legitimate, high-income opportunities for motivated individuals nationwide.

Business Capital,” or related terms before making any financial decisions, the company is committed to full transparency and real-world results.

Mark Shelton, a longtime entrepreneur in alternative lending and business formation, built Pure Business Capital to provide fast, ethical funding solutions that traditional banks often cannot match.

The company specializes in hard money loans, including fix-and-flip financing, bridge loans, DSCR rental property loans, and commercial funding up to \$10 million+. In addition, Pure Business Capital supplies premium aged shelf corporations that help entrepreneurs quickly establish business credit, bid on contracts, and access better financing terms.

Now Open: Remote Agent Opportunities with Strong Income Potential

Pure Business Capital is actively recruiting remote agents and sales partners. Participants can earn substantial commissions by:

- Selling aged shelf corporations to business owners and investors.
- Referring clients for hard money loans and business funding deals.

No prior experience, license, or background check is required. Agents work 100% from home, set their own hours, and receive full training, certification, lead-generation tools, and ongoing support. Commission splits range from 50% to 75% on shelf corporation sales (with a \$4,500 minimum per deal), plus 2–3% on closed loans. Many partners earn \$300,000+ annually, with daily direct-deposit payments possible starting in the first week.

To equip new partners for immediate success, Mark Shelton created the Shelf Corporation Mastery program. This comprehensive training covers sourcing, selling, and profiting from aged corporations while bundling Pure Business Capital’s proven funding programs for additional income streams.
