

## myfactory & mesonic Partner ERP 4 Business Launches Free ERP Toolbox for Manufacturing SMEs

Certified myfactory, mesonic and Docuvita Partner ERP 4 Business ([erp-4-business.de](http://erp-4-business.de)) from Germany supports SMEs in manufacturing, mechanical engineering and automotive with 100+ free ERP analysis tools.

The graphic features a dark blue background with a faint grid pattern. On the left, the text 'ERP TOOLBOX' is written in large, white, bold letters, with 'Fertigung & Produktion' underneath in a smaller white font. A thin orange horizontal line is positioned below 'Fertigung & Produktion'. A vertical orange line separates this text from the right side. On the right, the number '100+' is displayed in large, bold, orange font, with 'kostenlose Tools' written below it in white. In the bottom right corner, the 'ERP 4 BUSINESS' logo is shown, with 'ERP 4' in white and 'BUSINESS' in orange, and 'POWERED BY escape consult' in small white text below it.

**Magdeburg, Sachsen-Anhalt Mar 12, 2026** ([Issuewire.com](http://Issuewire.com)) - ERP 4 Business, operating as a certified myfactory Partner (<https://erp-4-business.de/myfactory-erp>), mesonic Partner (<https://erp-4-business.de/mesonic-winline>) and Docuvita Partner (<https://erp-4-business.de/docuvita>) across the DACH region, has launched a free digital ERP Toolbox for manufacturing companies. The platform targets SMEs in manufacturing, production, mechanical engineering and automotive with 10 to 200 employees, offering over 100 interactive analysis and planning tools — no registration required, completely free of charge.

### ERP Projects Frequently Fail Due to Lack of Preparation

Studies show that up to 70 percent of all ERP implementations exceed budget or schedule. Manufacturing companies in industries such as mechanical engineering, automotive and metalworking face the particular challenge of migrating complex production processes into a new system without disrupting ongoing operations. The ERP Toolbox by ERP 4 Business (<https://erp-4-business.de/erp-toolbox-formular>) addresses exactly this problem: interactive checklists, readiness checks and calculators help decision-makers objectively assess their current situation and prepare a well-founded system selection.

## **Tools for ERP in Manufacturing, Production and Beyond**

Available tools include an ERP Readiness Check for manufacturing companies, an SAP Dependency Analysis Tool for businesses looking to replace SAP, and an IT Readiness Check for companies in succession situations. Additional tools cover topics such as interface analysis, process maturity and degree of digitalization. All tools are industry-specific and designed for ERP in manufacturing (<https://erp-4-business.de/erp-fertigung>) and ERP in production (<https://erp-4-business.de/erp-produktion>) environments.

## **25 Years of Experience as myfactory Partner, mesonic Partner and Docuvita Partner**

ERP 4 Business has been a certified implementation partner for over 25 years — for myfactory (Cloud ERP, SaaS, GDPR-compliant, hosted in Germany), Mesonic WinLine (on-premise/hybrid ERP) and Docuvita (document management system). With over 70 active clients primarily in metal, mechanical and textile manufacturing, the company brings deep industry expertise that has directly shaped the development of the Toolbox. The portfolio is further complemented by an in-house development team and an e-learning portal for myfactory training (<https://erp-4-business.de/myfactory-schulung>).

"Manufacturing companies don't need a consultant walking in with a presentation. What they need first is clarity about their own level of process maturity. That's exactly what the Toolbox delivers," says the ERP 4 Business team.

## **Free to Use, Available Immediately**

All tools are freely accessible at [erp-4-business.de](https://erp-4-business.de) (<https://erp-4-business.de>). Companies that wish to follow up with a personal ERP consultation can submit a non-binding inquiry directly through the integrated contact form. ERP 4 Business supports manufacturing companies through the entire ERP lifecycle — from system selection and implementation to ongoing support — as a certified myfactory Partner, mesonic Partner and Docuvita Partner.

## **About ERP 4 Business – Escape Consult GmbH & Co. KG**

ERP 4 Business powered by Escape Consult GmbH & Co. KG, headquartered in Wernigerode (Saxony-Anhalt), operates under the ERP 4 Business brand as a specialized ERP partner for the manufacturing sector across the DACH region. The company is an official service partner for myfactory, Mesonic WinLine and Docuvita, guiding SMEs in manufacturing, mechanical engineering, automotive and production through their entire ERP lifecycle.
