Pune, Maharashtra Mar 11, 2026 (Issuewire.com) - OptraHEALTH, a leading digital health solutions company, recently launched Alcounsyl, a patented AI-powered medical counseling app designed to bridge the critical medical literacy gap between doctors and patient understanding across India. Alcounsyl empowers individuals to decode complex medical reports in plain language to help them take

charge of their health with clarity and confidence.

Every year, millions of Indians receive Blood, ECG / EKG, 2D ECHO, CT Angio, and Cardiac MRI reports filled with medical jargon that leaves them confused, anxious, and uninformed. With an acute shortage of qualified medical counselors and overburdened healthcare facilities, patients frequently make decisions without truly understanding their health status. Alcounsyl changes that by putting an app with medical-grade accuracy, powered by patented Clinical Intelligence, in every patient's pocket.

Key Features

Instant Report Analysis:

Upload any medical report and receive a medical-grade, clear, jargon-free explanation within seconds.

Ask Any Question:

Ask any question in natural language. Alcounsyl also provides contextually relevant pointers.

ExpertConnect:

Instantly connect with doctors like cardiologists and physicians for expert guidance, video consultation, and follow-ups.

"With Alcounsyl, we are on a mission to democratize healthcare counseling in India. Every patient deserves timely, accurate, and compassionate medical guidance. Alcounsyl makes that a reality."

— **Gauri Naik, CEO, OptraHEALTH**

With smartphone adoption surpassing 700 million users and a growing digital health infrastructure, Alcounsyl is positioned at the intersection of medical information, AI, and patient empowerment. It seamlessly provides contextual guidance tailored to specific health situations, tracks patients' medical history, while protecting health information with the highest security standards.

Alcounsyl is available for download on the Apple App Store and Google Play Store.
