

## RodentX Launches New Website to Deliver Faster, Smarter & Guaranteed Rodent Control Across the UK

Specialist rodent exterminators unveil modern, user-friendly website making professional rat and mouse removal easier and more transparent than ever before.

**Manchester, United Kingdom Mar 19, 2026 ([IssueWire.com](https://www.issuewire.com))** - RodentX, one of the UK's fastest-growing specialist rodent control companies, has officially launched its brand-new website, offering homeowners and businesses instant access to guaranteed, poison-free and discreet rodent removal services.

The new website has been completely redesigned with the customer in mind. Visitors can now:

- Get an instant online quote in under 60 seconds
- View transparent fixed pricing with no hidden fees
- Book same-day or next-day appointments directly online
- Read genuine customer reviews and before/after case studies
- Access free advice on rodent proofing and prevention

Unlike traditional pest control companies that rely heavily on toxic rodenticides, RodentX specialises in modern, eco-friendly methods including non-toxic trapping, digital monitoring systems, and full proofing solutions that stop rodents returning all backed by a 100% satisfaction guarantee.

“We were getting so many calls from frustrated customers who had been let down by big national firms or left with recurring problems after cheap treatments,” said Daniel, Founder of RodentX. “The new website makes everything simpler and clearer. Customers can now see exactly what they’re getting, book instantly, and have complete confidence they’re dealing with genuine rodent specialists not general pest controllers.”

Since launching in 2023, RodentX has quickly built a reputation for solving the toughest rat and mouse infestations across Greater London, Essex, Kent, Surrey, Hertfordshire and surrounding areas. The company is fully insured, RSPH Level 2 certified, and uses only BPCA/ACTA-compliant methods.

The new website also features an expanding blog section with practical advice on identifying rodent signs, preventing infestations, and understanding new UK legislation around rodent control.

Homeowners and businesses can now get a free, no-obligation quote or book a survey directly.

### **About RodentX**

RodentX is a specialist rodent control company operating across London and the Home Counties. Using the latest non-toxic technology and proofing techniques, RodentX provides fast, discreet and permanently effective solutions for rat, mouse and squirrel problems in both residential and commercial properties. All work is fully guaranteed.
