

RunSafe Security Honored as 2026 SC Awards Finalist for Best Supply Chain Security Solution

RunSafe Security's finalist nomination for the 2026 SC Awards underscores its commitment to secure the software that powers critical infrastructure and embedded systems worldwide

McLean, Virginia Mar 9, 2026 ([IssueWire.com](https://www.issuewire.com)) - [McLean, VA — March 9, 2026 — RunSafe Security](#) is proud to announce that it has been named a finalist in the prestigious 2026 SC Awards in the Best Supply Chain Security Solution category, underscoring the company's commitment to excellence and leadership in the cybersecurity industry. The SC Awards, now in its 29th year, recognize the solutions, organizations, and individuals that have demonstrated outstanding achievement in advancing the security of information systems.

A complete list of 2026 SC Awards finalists is available on SC Media here: <https://www.scworld.com/sc-awards-finalists>

“Being named a finalist for the 2026 SC Awards is a tremendous honor and a strong validation of our mission to secure the software that powers critical infrastructure and embedded systems worldwide,” said Joseph M. Saunders, Founder and CEO of RunSafe Security. “From industrial control systems to connected medical and energy devices, manufacturers face growing pressure to ensure transparency, integrity, and resilience in their software supply chains. Our build-time SBOM generator for embedded systems provides immediate, accurate visibility into the components within their firmware, while our protections help eliminate entire classes of vulnerabilities before deployment. We’re proud to be recognized for advancing a more secure, resilient foundation for the systems society depends on.”

The 2026 SC Awards entries were evaluated across 33 specialty categories by a distinguished panel of judges, comprising cybersecurity professionals, industry leaders, and members of the CyberRisk Alliance CISO community, representing sectors such as healthcare, financial services, education, and technology.

This year, all finalists are invited to the SC Awards Reception, where the 2026 winners will be announced on Tuesday, March 24, 2026, at RSAC in San Francisco.

“The SC Awards celebrate excellence and innovation in cybersecurity, recognizing the people and

technologies driving real progress,” said CyberRisk Alliance Chief Content Officer Kelley Damore, “Being named a finalist is a mark of credibility and trust — a powerful validation from peers and experts who understand what it takes to deliver real-world security impact.”

About RunSafe Security

RunSafe Security protects embedded software across critical infrastructure, delivering automated vulnerability identification and software hardening from build-time to runtime to defend the software supply chain and critical systems without compromising performance or requiring code rewrites.

The RunSafe Security Platform includes an authoritative build-time SBOM generator for embedded systems and C/C++ projects, automated vulnerability identification and risk quantification, license compliance, and patented memory relocation techniques to prevent exploitation even when a patch is unavailable.

Headquartered in McLean, Virginia, with an office in Huntsville, Alabama, RunSafe Security’s customers span the aerospace and defense, energy, operational technology, industrial automation, transportation and automotive, medical device, and high-tech manufacturing verticals.
