SciSummary & ACM: Partnering to Accelerate Academic Research with AI

ACM selected SciSummary to power AI summaries across 300,000+ papers, now researchers everywhere can use the same engine to read less, find relevance faster, and move their work forward.

New York City, New York Mar 30, 2026 (Issuewire.com**)** - We are thrilled to announce a landmark partnership between SciSummary and the Association for Computing Machinery (ACM). SciSummary has been selected as the AI provider to summarize ACM's extensive library of published papers, bringing domain-specific AI summarization to the world's largest educational and scientific computing society.

Making Research More Accessible

Through this partnership, SciSummary is processing over 300,000 published papers from the ACM Digital Library. By providing concise, accurate, and easily digestible summaries, we are making it easier than ever for researchers, professionals, and students to understand complex technical literature, evaluate relevance at a glance, and accelerate their workflows.

Your Ultimate AI Research Assistant

The integration with ACM is just the beginning. The same powerful engine that drives ACM's summaries is available to researchers worldwide. SciSummary is designed to be your comprehensive AI research assistant, offering features that go far beyond basic summarization:

- **Personalized Digest Feeds:** Stay on top of the latest literature tailored to your specific

interests.

- **Document Q&A:** Chat directly with full texts to extract exact methodologies, findings, and data points.
- **Research Organization:** A centralized hub to organize, tag, and revisit important papers seamlessly.

Join the Future of Research

Experience the platform trusted by ACM to distill hundreds of thousands of complex technical papers. Whether you're conducting a literature review or staying current in your field, SciSummary helps you focus on what matters most - your actual research.
