

Security Expert Elke Meert Releases Groundbreaking Field Guide

A Hunter's Eye on Behavioral Detection and Threat Assessment

Opwijk, Vlaams-Brabant Mar 6, 2026 ([Issuewire.com](https://www.Issuewire.com)) - Renowned security specialist Elke Meert has officially published *A Hunter's Eye: Advanced Behavioural Analysis and Threat Detection*, a definitive operational handbook engineered for professionals who must detect threats in real time and make critical decisions under pressure. The book is now available globally.

Drawing on decades of hands-on experience in defense, civil security, and government operations, Meert has crafted a science-based framework that bridges the gap between behavioral theory and field application. The book delivers structured methodologies for identifying anomalous behavior, recognizing hostile intent, and strengthening situational awareness across a wide range of high-risk environments.

Spanning seven comprehensive chapters, *A Hunter's Eye* covers the neuroscience of threat detection, cognitive bias in observation, cultural modifiers in behavioral analysis, and advanced deception indicators — each grounded in both scientific research and real-world operational experience. From managing the amygdala hijack under fire to building expert-level pattern recognition, the book equips readers with actionable tools unavailable in any comparable resource.

“Every security professional, law enforcement officer, and intelligence operative deserves a field-tested framework for reading human behavior under pressure. This book is that framework — built from science, refined in the field.”

— **Elke Meert, Author**

Meert brings unparalleled credentials to the subject. A certified mediator, counter-terrorism practitioner, and behavioral detection instructor, she has served in key roles at the Belgian Ministry of Defence and the Federal Public Service of the Interior. Her operational background includes coordinating high-level international events, developing national security plans, and training professionals in behavioral detection, negotiation, and crisis communication.

The book is designed for security consultants, law enforcement officers, military and intelligence personnel, corporate security teams, and anyone working in high-stakes, threat-sensitive environments. It is available globally in print and digital formats.

About Elke Meert

Elke Meert is a security specialist with an extensive background in defense, civil security, and government operations. A certified mediator, counter-terrorism practitioner, and behavioral detection instructor, she has spent her career translating behavioral science into practical tools for security, law enforcement, and high-risk operational settings.
