**Pune, Maharashtra Mar 15, 2026** ([Issuewire.com](http://www.Issuewire.com)) - Sneh Precast & ConstoSolutions Pvt. Ltd. operates in the precast concrete manufacturing sector and supplies construction components used in infrastructure, industrial development, and urban construction projects. The [company manufactures](#)

[precast products](#), including pavers, drainage systems, retaining structures, boundary walls, walling blocks, and premix mortar products.

The organization was established in 2008 and operates manufacturing facilities in Maharashtra for the production and supply of precast concrete elements used in construction projects.

## Company Overview

Sneh Precast & ConstoSolutions Pvt. Ltd. manufactures precast concrete products used in construction and infrastructure development. The company supplies products for applications such as road construction, drainage infrastructure, site development, industrial projects, and real estate construction.

The product portfolio includes landscaping products, drainage systems, retaining wall structures, boundary wall panels, concrete blocks, and premix mortar products used in construction projects.

## Manufacturing Facilities

The company operates production units in Maharashtra.

Manufacturing locations include:

- Markal, Tal-Khed, Pune
- Bhavadi, Wagholi-Tulapur Road, Pune
- Nere, Tal-Mulshi, Pune

Administrative offices are located in Pune and Navi Mumbai.

These facilities support the manufacturing of precast products used in infrastructure and construction projects.

## Product Portfolio

Sneh Precast manufactures multiple categories of precast products used in infrastructure construction and urban development.

## Landscaping Solutions

Landscaping products are used in walkways, roads, parking areas, and outdoor surface development projects.

Products in this category include:

### Paver Blocks

Different paver block patterns are produced for road and surface applications.

Types include:

- Square Pavers
- Rectangular Pavers

- Zigzag Pavers
- Cobble Stone Pavers

These blocks are used in pedestrian pathways, parking areas, driveways, and urban spaces.

### **Combination Pavers**

Combination pavers are used for patterned paving layouts in landscape and surface design projects.

### **Linear Pavers**

Linear pavers are used in permeable paving systems where water drainage is required through cavities in the paving structure. These pavers can be used for pedestrian zones and vehicle access areas.

### **Kerb Stones**

Kerb stones are used in road and pavement construction.

Types include:

- Bull Nose Kerb Stone
- Flush Kerb Stone

Kerb stones are used for road edges, pedestrian areas, and traffic separation.

### **Tiles**

Concrete tiles are produced for surface installation in public areas and infrastructure projects.

Types include:

- Pencil Tiles
- Tactile Tiles
- Wooden Finish Tiles
- Landmaster Tiles

### **Drainage Solutions**

Drainage products are used in water flow management systems in infrastructure and urban development.

Products include:

#### **Sneh Classic Precast U Drain**

Precast U drains are used in drainage systems and cable trenching infrastructure. These units are manufactured in sizes ranging from 300 mm to 1200 mm width and are used for water flow channels in roads and construction projects.

#### **Chamber Lid**

Chamber lids are used to cover drainage chambers and access points in underground drainage networks.

### **Box Culvert**

Precast box culverts are used for water passage under roads and infrastructure corridors.

### **Precast Manhole Chamber**

Precast manhole chambers are used in underground sewer and drainage networks.

### **RCC Hume Pipe**

RCC hume pipes are used in pipeline systems for water flow, drainage channels, and underground infrastructure.

### **Retaining Solutions**

Retaining wall systems are used for soil retention, site level management, and infrastructure support.

Product category includes:

#### **RE Walls**

Reinforced earth walls are used for soil retention in infrastructure projects including roads, bridge approaches, and land development areas.

#### **Boundary Wall Solutions**

Precast boundary wall systems are used for perimeter structures around residential layouts, industrial areas, and infrastructure sites.

Types include:

#### **Light Duty Boundary Wall**

Used in residential layouts and low-load boundary applications.

#### **Heavy Duty Boundary Wall**

Used in industrial premises and infrastructure zones. The system consists of precast panels and columns designed for perimeter boundary installation.

### **Walling Solutions**

Walling products are used in building construction for internal and external walls.

Products include:

#### **Solid Concrete Blocks**

Solid blocks are used in structural wall construction.

## **Hollow Blocks**

Hollow concrete blocks are used for wall construction where reduced weight and cavity space are required.

## **Mortar Solutions**

The company also manufactures premix mortar products used in construction and finishing applications.

The **Consto premix product range** includes:

- Consto Plast – premix plaster
- Consto Bond LT / XT / XXT – tile adhesive
- Consto Fix / Prime – block jointing mortar
- Consto Grout CL1 / CL2 – grout material
- Consto Indurate – floor hardener
- Consto Re-Mortar – repair mortar
- Consto Anorak – water repellent plaster
- Consto Mkrit MI1 – micro concrete

These products are used in masonry work, tile installation, repair work, and surface finishing.

## **Applications**

Products manufactured by the company are used in the following sectors:

- Road construction
- Industrial development projects
- Real estate construction
- Urban infrastructure development
- Drainage and water management systems
- Site development and landscaping projects
