

System4 of Phoenix Transitions to New Ownership as Demand for Commercial Cleaning Grows Across Arizona

Chad and Cherie Buntyn take ownership of System4 of Phoenix, continuing janitorial services for industrial and commercial clients across the Valley

Phoenix, Arizona Mar 24, 2026 ([IssueWire.com](https://www.issuewire.com)) - As businesses across Arizona place a renewed focus on cleanliness, safety, and compliance, System4 of Phoenix is entering a new chapter. The commercial cleaning company, serving industrial and commercial clients throughout the Phoenix metro area, has officially transitioned ownership to **Chad and Cherie Buntyn**.

Founded in 2009, System4 of Phoenix has built its reputation by delivering consistent janitorial services to offices, medical facilities, restaurants, and industrial properties across Phoenix, Scottsdale, Mesa, Tempe, and Chandler. The company specializes in customized cleaning programs designed to support daily operations in high-traffic and compliance-driven environments.

Chad Buntyn, now President, will lead day-to-day operations with a focus on service consistency, client experience, and operational growth. Cherie Buntyn, serving as Secretary, will oversee financial operations and support long-term expansion.

“This isn’t about changing what works—it’s about building on it,” said Chad Buntyn. “Businesses today expect more from their cleaning providers—more consistency, more accountability, and a higher standard overall. Our goal is to continue raising that standard across the Phoenix market.”

The ownership transition comes at a time when demand for professional cleaning services is increasing across both industrial and commercial sectors. From manufacturing facilities and warehouses to

medical offices and corporate workspaces, businesses are prioritizing structured cleaning programs that align with safety protocols and industry expectations.

For **Mark Adriansen**, former owner of System4 of Phoenix, the decision to transition ownership was focused on long-term continuity.

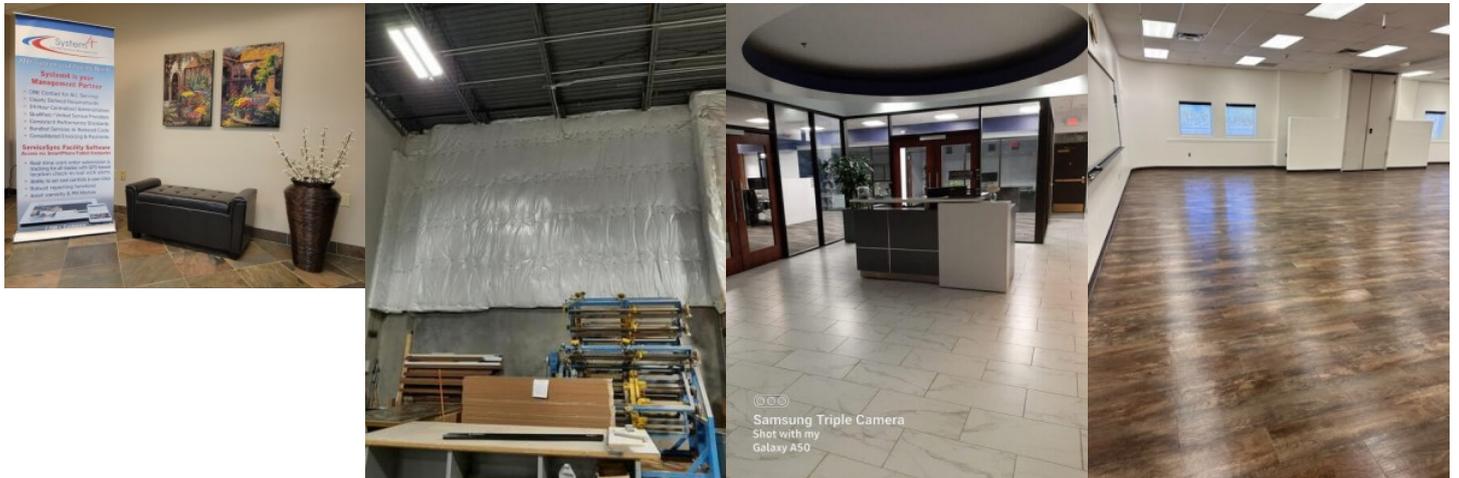

“System4 of Phoenix has been serving this market since 2009, and it was important to me that the next owners understood what that responsibility looks like,” said Adriansen. “Chad and Cherie bring the leadership and commitment needed to continue delivering reliable, high-quality janitorial services to both industrial and commercial clients.”

Under new ownership, System4 of Phoenix plans to continue expanding its presence across the Valley while maintaining its focus on customized cleaning solutions tailored to each facility’s needs, schedule, and operational demands.

As expectations for workplace cleanliness continue to evolve, System4 of Phoenix is positioning itself to remain a trusted partner for businesses that require consistent, professional commercial cleaning services.
