

Tangelo Labs Unveils New Lineup of 4K Ultra-HD Ambient Experiences for Immersive Focus and Relaxation

New York City, New York Mar 17, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Tangelo Labs, a digital production studio specializing in high-fidelity visual assets, today announced the rollout of its premiere lineup of 4K ambient journeys. Launched in February 2026, the studio is positioning itself at the intersection of cinematic art and AI-driven production to serve the growing US "Slow TV" and digital wellness markets.

The new collection features ultra-high-definition landscapes and curated atmospheric journeys, rendered at 4K resolution to meet the demands of modern home theater and high-end display setups. By focusing on deep-focus cinematography and high-bitrate audio, Tangelo Labs aims to provide a premium digital escape for remote workers, wellness enthusiasts, and those seeking high-quality background aesthetics to improve concentration.

“The goal of Tangelo Labs has always been to push the boundaries of what ambient content can be,” according to the team’s Technical Content Strategist for the studio. “By utilizing a sophisticated production pipeline including DaVinci Resolve and dedicated AI-generation hardware, we are able to provide a level of detail that transforms a simple screen into a window to another world—ideal for both deep work and deep rest.”

Strategic Growth, Hospitality, and Partnerships as part of its 2026 roadmap, Tangelo Labs is actively seeking collaborations with lifestyle brands, wellness influencers, and partners within the hospitality sector to create co-branded immersive experiences for physical and digital spaces. Additionally, the studio provides specialized consultancy services for organizations looking to integrate high-fidelity

digital atmospheres and AI-driven content workflows into their own brand strategies. If you are interested, please reach out to us to touch base on further details.

Key Features of the New Lineup:

True 4K UHD Resolution: Optimized for large-scale displays.

Professional Color Grading: Processed via DaVinci Resolve for cinematic visual depth.

Targeted Immersion: Specifically paced for stress reduction and productivity focus.

The new video series is available now on the official Tangelo Labs YouTube channel:
