

3 Ten Plumbing Just Hit 100+ Five-Star Google Reviews!

3 Ten Plumbing Earns 100-Plus Five-Star Google Reviews From the Torrance Community It Has Spent Years Serving

Torrance, California May 25, 2026 ([IssueWire.com](https://www.issuewire.com)) - Torrance-based family plumbing company 3 Ten Plumbing crosses the 100 five-star Google review mark, a quiet but meaningful reflection of the relationships it has built one service call at a time.

Some milestones arrive with fanfare. Others arrive quietly, built up over dozens of early mornings, late-night emergency calls, and honest conversations at a customer's front door. For 3 Ten Plumbing, a licensed and insured family-owned plumbing company serving Torrance and the South Bay area of Los Angeles County, reaching 100-plus five-star reviews on Google falls firmly into the second category. It is not a number the company chased. It is a number that accumulated because people felt their experience was worth sharing.

The milestone was reached in 2025, and it carries weight that goes beyond a rating on a screen. In a field where homeowners often feel uncertain about who to call, who to trust, and whether the price they are given is a fair one, a consistent pattern of five-star feedback tells a story that no advertisement can tell on its own. It says that real people, in real situations, felt they were treated well.

"We are a family business, and we think about our customers the way a family thinks about its neighbors," said a company representative at 3 Ten Plumbing. "When someone calls us at midnight with a burst pipe, they are not just a work order. They are a person dealing with one of the most stressful things that can happen at home. This milestone reminds us that showing up for those moments, and

doing it right, is what actually matters."

3 Ten Plumbing has built its reputation on a service model that prioritizes clarity and reliability over everything else. Customers are given upfront pricing before any work begins, removing the uncertainty that often accompanies home repair services. The company also offers same-day scheduling and maintains 24/7 availability for emergency calls, making it a practical choice for homeowners across the South Bay who cannot always predict when a plumbing problem will surface.

The company's service area covers a wide stretch of Los Angeles County's South Bay communities, including Torrance, Carson, Gardena, Hermosa Beach, Redondo Beach, Lawndale, El Segundo, Manhattan Beach, Lomita, Long Beach, San Pedro, Rancho Palos Verdes, Rolling Hills, Palos Verdes Estates, and Hawthorne. Across all of these neighborhoods, the nature of the calls varies, but the approach stays the same.

The range of services 3 Ten Plumbing provides reflects the full scope of what homeowners and businesses face on any given day. From something as routine as a faucet repair or [garbage disposal installation](#) to something as involved as a sewer line replacement or new construction plumbing, the company handles it with the same licensed team and the same standard of care. [Earthquake shut-off valve installation](#), a service that carries particular relevance for Southern California homeowners, is also part of the company's offering.

For many customers, the decision to leave a **five-star review** comes down to one specific moment. Perhaps it was a technician who explained the problem in plain language before reaching for a tool. Perhaps it was a quote that came in lower than expected, or a job that was finished the same afternoon it was requested. These are the details that do not always make it into a description of services, but they are the details that stay with people long after the water is running again.

Financing options are available for larger projects, which have made [3 Ten Plumbing](#) accessible to a broader range of households in the region. When a homeowner is facing a water heater failure or a significant pipe repair, the ability to spread the cost of the work can be the difference between addressing the problem immediately and letting it grow.

The 100-plus five-star milestone also reflects something practical about how people find service providers today. Review counts and ratings are among the first things a homeowner notices when searching for a plumber on Google or Google Maps, and a strong, consistent record of positive feedback makes it easier for new customers to make a confident decision. For 3 Ten Plumbing, that visibility is a byproduct of doing good work rather than the goal itself.

As the company continues to serve the South Bay and expand its footprint across Los Angeles County, the milestone serves as both a moment of recognition and a quiet commitment to continue earning it. The reviews will keep coming in, one job at a time, the same way they always have.

Homeowners and businesses seeking plumbing services in Torrance or the surrounding South Bay communities can reach 3 Ten Plumbing by phone or through the company's online booking platform at <https://3tenplumbing.com/>.
