

# Agility CMS Named Headless CMS Leader and Earns 38 Badges in G2 Spring 2026 Reports

Enterprise buyers rank Agility CMS best in class for usability, administration, and requirements met.

Earns **38** badges across **3** G2.com software categories.

Spring 2026 · Headless CMS · Web Content Management · Web Ops Platforms

**Toronto, Ontario Apr 13, 2026** ([IssueWire.com](https://www.issuewire.com)) - [Agility CMS](https://www.agilitycms.com) today announced that G2, the world's largest software marketplace, has named Agility CMS a Leader in the Spring 2026 Grid Report for Headless CMS. The recognition reflects 203 verified reviews and a 4.4 out of 5 rating on G2, and is based entirely on scores submitted by software buyers, not analyst assessments or vendor-provided data.

In the Spring 2026 cycle, enterprise buyers specifically named Agility CMS "Easiest To Do Business With" and "Best Meets Requirements" in the Headless CMS category, and "Easiest To Use", "2Easiest Admin", "Easiest To Do Business With", and "Best Meets Requirements" in the Web Content Management category.

Those six enterprise-specific designations reflect how Agility CMS performs after deployment, when teams operate the platform daily rather than in a demo environment.

Agility CMS earned 38 badges across three G2 categories:

- 1) Headless CMS
- 2) Web Content Management
- 3) Web Ops Platforms

The Headless CMS category earned the Leader badge and a Momentum Leader designation. It also gained High Performer recognition in the Enterprise and Mid-Market segments, as well as regional High Performer badges in Canada, Asia Pacific, Asia, and India.

"Earning the G2 Headless CMS Leader designation alongside 38 badges in Spring 2026 shows the trust our customers place in us. Enterprise teams have real requirements, little tolerance for complexity, and high expectations of their vendors when creating digital experiences. Hearing from them directly through verified reviews that Agility delivers on all three drives us to keep building the way we do," said Jon Voigt, CEO of Agility CMS.

## What the Recognition Reflects

The enterprise usability recognition across both Headless CMS and Web Content Management validates a core product decision at Agility CMS: that composable architecture and low administrative overhead are not in conflict.

Enterprise deployments of headless CMS platforms often require content teams to manage complex multi-site and multilingual operations. The Easiest Admin designation at the enterprise level shows that Agility CMS handles this complexity without passing it on to the teams running the platform.

"Most headless CMS platforms ask enterprise teams to choose between architectural capability and day-to-day simplicity. We never accepted that tradeoff. These G2 results show that our customers did not have to make it either," said Joel Varty, CTO at Agility CMS.

## A Global Footprint Validated by Verified Reviews

Agility CMS is a MACH Alliance member and one of the only Canadian-founded headless CMS platforms to hold the G2 Leader designation. Regional recognition across Canada, EMEA, Europe, Asia Pacific, Asia, and India reflects an international customer base that consistently rates the platform regardless of geography. The Spring 2026 results extend a consecutive recognition streak in G2's Headless CMS reports. Verified reviews are available at <https://www.g2.com/products/agility-cms/reviews>.

## About Agility CMS

Agility CMS is the easy-to-use headless CMS with ridiculously good support. Their content management platform removes technical constraints that slow down development teams and gives content creators greater autonomy to move faster. As a MACH Alliance member and one of the few Canadian headless CMS platforms, Agility is built for organizations that need flexibility, performance, and scalable content operations.
