

America's Best In Medicine: Yvette Dancel Expands Access To Quality Patient-Centered Telehealth Care In Millville, NJ

Dedicated to Transforming Healthcare and Enhancing Patient Experiences in the Community

Millville, New Jersey Apr 23, 2026 ([IssueWire.com](https://www.issuewire.com)) - Yvette Dancel, a dedicated Nurse Practitioner based in Millville, New Jersey, is making a meaningful impact on patient care through her clinical expertise and forward-thinking approach to healthcare delivery. Currently serving as a per-diem provider at Millville Medical Center for Dr. Piszcz-Connelly, she plays a vital role in an internal medicine setting while also exploring opportunities to transition into a full-time position. Alongside her clinical responsibilities, Yvette is the founder of Hancebridge Health, LLC, an emerging telehealth practice aimed at expanding access to convenient, patient-centered care.

With more than 20 years of experience in emergency medicine, Yvette has built a strong clinical foundation rooted in rapid assessment, critical thinking, and decisive action. Her tenure at South Jersey Hospital—now known as Inspira Health—shaped her ability to recognize acuity early and respond effectively in high-pressure environments. These experiences not only refined her clinical judgment but also provided her with a comprehensive understanding of the challenges patients face when access to timely care is limited.

After earning her Family Nurse Practitioner credential, Yvette transitioned into primary care, where she could focus more directly on prevention, continuity, and long-term health outcomes. Her first role as an FNP at CompleteCare Health Network, a Federally Qualified Health Center, allowed her to treat patients across the lifespan, from infants to older adults. This diverse clinical exposure strengthened her ability to tailor care to a wide range of needs, reinforcing her commitment to individualized, compassionate treatment. Today, she continues this work in an internal medicine setting, while also providing monthly visits to assisted-living residents, helping manage chronic conditions and reduce avoidable hospitalizations.

Yvette's approach to healthcare is deeply rooted in respect for each patient's unique background, values, and lived experiences. She emphasizes the importance of cultural awareness, humility, and collaboration in clinical practice, recognizing that effective care often requires a multidisciplinary perspective. Her academic journey reflects this commitment to growth and excellence, having earned her Bachelor of Science in Nursing from Wilmington University in 2015 and her Master of Science in Nursing from Chamberlain University in 2022. These accomplishments build upon her extensive bedside experience, enabling her to deliver thoughtful, comprehensive care to her community.

A strong advocate for innovation in healthcare, Yvette is particularly passionate about the role of telehealth in improving access and efficiency. Through Hancebridge Health, LLC, she is working to develop a platform that brings high-quality medical care directly to patients, especially those who face barriers such as transportation challenges, mobility limitations, or difficulty securing timely appointments. She views telehealth not as a replacement for traditional care, but as a powerful complement that enhances accessibility while maintaining personalized, patient-focused service.

Yvette's perspective on healthcare is also shaped by her firsthand exposure to the systemic pressures within emergency medicine. She has witnessed the emotional toll and burnout that can affect both patients and providers in high-acuity settings, particularly when individuals rely on emergency services due to gaps in preventive or follow-up care. These experiences have reinforced her belief in the importance of early intervention, continuity, and accessible outpatient services as key drivers of better health outcomes.

Motivated by a desire to create meaningful change, Yvette remains committed to improving the patient experience at every level. Whether through her clinical practice, her work with assisted-living residents, or her efforts to expand telehealth services, she strives to build a more responsive and compassionate healthcare system. Her work reflects a clear vision: one where patients receive timely, appropriate care

that not only addresses immediate concerns but also supports long-term health and well-being.
