

## Art In Stone, Inc., a 40-Year Bay Area Monument Leader, Launches Newly Renovated Website for Custom Memorials

**San Francisco, California Apr 11, 2026** ([IssueWire.com](https://www.issuewire.com)) - Art In Stone, Inc., one of Northern California's most established and respected monument design companies specializing in the creation of custom, one-of-a-kind granite and marble memorials, today announced the launch of its newly renovated website: [www.artinstonesf.com](https://www.artinstonesf.com).

For over 40 years, Art In Stone has been entrusted by families throughout the San Francisco Bay Area and Northern California to design and create custom granite and marble headstones, handcrafted monuments, and lasting memorials. The new website reflects the company's continued commitment to excellence — combining generations of master craftsmanship with modern technology to better serve clients during life's most difficult moments.

What distinguishes Art In Stone is its combination of fine art expertise, generational craftsmanship, and full-service memorial guidance—from initial design through final installation.

## A Thoughtful Redesign Focused on Families

The newly redesigned website was developed with a clear mission: to make the memorial selection process more accessible, transparent, and supportive. Recognizing the emotional weight carried by families, the updated platform provides intuitive navigation, clear guidance, and a seamless user experience across various devices.

*“We have always believed that commemoration is both an art and a responsibility,”* said Leon Rader, founder of Art In Stone, Inc. and an accomplished American sculptor. *“This new website extends that philosophy into the digital space—providing clarity, inspiration, and reassurance when families need it most.”*

## Modern Design Meets Timeless Craftsmanship

The overhaul replaces an outdated, static website with a clean, mobile-friendly experience that aligns with the company’s long-standing reputation for precision, dignity, and enduring beauty. Visitors can now explore:

- Extensive photo galleries showcasing monuments across diverse religious and cultural traditions
- A wide range of design styles, materials, and engraving techniques
- Clear educational resources on memorial types, granite colors, and the design process
- Streamlined navigation for faster access to key information
- Easy contact and quote request options
- Art In Stone blog, updated regularly with company news, industry insights, and answers to frequently asked questions

The improved mobile experience ensures fast loading, easy legibility, and smooth navigation—critical for users searching on mobile devices.

## Transparency and Trust

In addition to visual enhancements, the website is designed to help families make informed decisions with confidence.

Quick access to customer testimonials and reviews further reinforces the trust Art In Stone has built over decades of service.

*“We designed this website to reflect who we are as a local family business,”* said Gita Rader, General Manager of Art In Stone, Inc. *“It allows us to communicate our values clearly, showcase our work, and guide families with transparency and compassion.”*

## Honoring a Legacy While Embracing the Future

The new website highlights the company’s deep-rooted legacy—generational craftsmanship shaped by thousands of memorial installations. While honoring its history, Art In Stone continues to evolve, ensuring that its services remain relevant, accessible, and responsive to the needs of today’s families.

By strengthening its online presence and improving visibility on platforms like Google, Art In Stone aims to reach more families seeking trusted, high-quality memorial solutions.

**About Art In Stone, Inc.**

Art In Stone, Inc. specializes in the design and creation of custom granite headstones, handcrafted monuments, and family memorials.
