FOR IMMEDIATE RELEASE — 12 APRIL 2026

London, United Kingdom Apr 17, 2026 (Issuewire.com) - The UK's leading AI automation platform helping businesses recover revenue, reduce costs and scale without hiring.

AURIFORCE LAUNCHES AI AGENTS TO HELP UK BUSINESSES RECOVER LOST REVENUE FROM MISSED FOLLOW-UPS

London-headquartered Auriforce — trusted by a rapidly growing base of UK enterprises — launches intelligent AI agents that eliminate the operational blind spots costing British businesses millions in lost conversions and overdue payments every year.

Auriforce, a UK-headquartered AI technology company, has launched a powerful suite of intelligent AI agents purpose-built to automate customer follow-ups and billing processes for British businesses — directly addressing one of the most persistent revenue drains facing UK enterprises today: income lost to manual operational gaps.

With hundreds of UK businesses now relying on Auriforce to run their critical workflows, the company has established itself as a leading AI automation partner for the UK market. From London financial services firms to regional SMEs across England, Scotland, and Wales, Auriforce's customer base spans sectors including financial services, professional services, healthcare, hospitality, and retail — all united by a single need: doing more without growing headcount.

Despite record pressure on UK operating costs, many businesses still rely on manual, error-prone processes for tasks as critical as lead follow-up and invoice chasing. Auriforce's agents run 24/7, autonomously, ensuring that every lead is contacted and every overdue payment is pursued — with zero additional headcount.

FOLLOW-UP AGENT Automates lead and customer engagement for UK sales teams — ensuring every prospect receives timely, consistent outreach regardless of team size or bandwidth. Never miss a hot lead again. For: UK Sales, CRM and Growth Teams

BILLING REMINDER AGENT Automates payment follow-ups across the full billing cycle — reducing outstanding invoices, accelerating cash collection, and improving cash flow predictability for UK finance teams. For: UK Finance, Billing and Operations

"UK businesses are leaving serious money on the table — not because they lack talent, but because critical tasks fall through the cracks. Our agents fix that permanently, running around the clock so your team doesn't have to." — Arun Chandrashekar, Founder - Auriforce

PROVEN RESULTS ACROSS THE UK

In a recent deployment with a London-based financial services firm (50+ employees), Auriforce's AI agents delivered transformational results within just four weeks — with zero new hires and no additional headcount.

96% — Lead Response Consistency (up from 62%)

28% — Uplift in Conversion Rates

35% — Reduction in Overdue Invoices

3-4x — Headcount Equivalent Delivered

These results are consistent with outcomes seen across Auriforce's broader UK customer base, where businesses regularly report faster revenue recovery, stronger pipeline conversion, and the operational output of 3 to 4 additional full-time team members — without the associated recruitment, salary, or management overhead.

WHY UK BUSINESSES CHOOSE AURIFORCE

Built for the UK Market Designed around the realities of British business — GDPR-compliant, Sterling-priced, and calibrated for UK buyer behaviour and payment cycles.

Zero Headcount. Maximum Output. Each AI agent delivers the output of 3 to 4 full-time employees, running 24/7 with no sick days, no holidays, and no management overhead.

CRM-Native Integration Plugs directly into your existing CRM — Salesforce, HubSpot, Zoho and more — with no rip-and-replace and no lengthy implementation cycles.

Immediate ROI UK clients report measurable returns within the first billing month, with typical payback periods of under 60 days from go-live.

AVAILABILITY AND UK PRICING

Both agents are available immediately to UK businesses. Pricing starts from £2,999 per month per agent a fraction of the cost of a single full-time hire, with no long-term contract required for initial deployments. CRM integration is included as standard, with dedicated UK-based onboarding support ensuring teams are live within days.

ABOUT AURIFORCE

Auriforce is a London-headquartered AI automation company on a mission to help UK businesses stop losing revenue to operational blind spots.

Built on a simple but powerful insight — British businesses don't lose money because they lack talent. They lose it because critical workflows fall through the cracks. Lead follow-ups missed. Invoices left unpursued. Opportunities lost not to competition, but to process.

Auriforce's answer is a suite of intelligent AI agents that run 24/7, autonomously handling the business-critical tasks that manual teams consistently under-deliver on — from customer follow-up and lead conversion to billing reminders and cash collection. Each agent is designed to operate continuously, at scale, without supervision — delivering consistent, measurable output every hour of every working day.

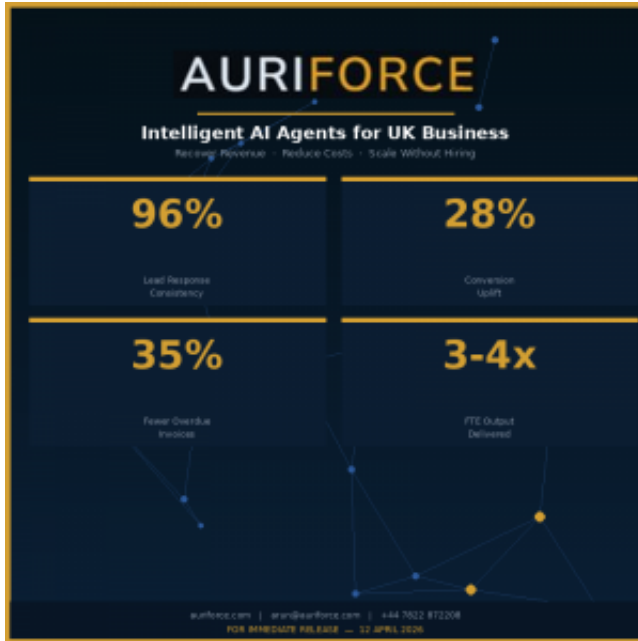

Today, Auriforce is trusted by a rapidly growing community of UK enterprises across financial services, professional services, healthcare, hospitality, and retail. Businesses that deploy Auriforce regularly report faster revenue recovery, stronger pipeline conversion, and the operational output of 3 to 4 additional full-time team members — without the associated recruitment, salary, or management overhead.

Built specifically for the UK market, Auriforce's agents are GDPR-compliant and Sterling-priced, integrating natively with the CRM platforms UK teams already rely on — including Salesforce, HubSpot, and Zoho — with no lengthy implementation or rip-and-replace required.
