

AuthorTune Unveils 'Strategic Narrative Mapping' to Shield Intellectual Property from AI Dilution

Los Angeles, California Apr 23, 2026 ([Issuewire.com](https://www.issuewire.com)) - [AuthorTune](https://www.authortune.com), the Los Angeles-based vanguard of high-authority ghostwriting, today announced the launch of its **Strategic Narrative Mapping (SNM)** framework. This methodology arrives as a critical solution for industry leaders seeking to safeguard their intellectual property (IP) and professional legacies against the rising tide of generic, AI-generated content.

As the digital marketplace reaches a saturation point with automated text, the value of a "Primary Source" has never been higher. AuthorTune's SNM framework is designed to extract deep, intuitive expertise from human authors and translate it into high-authority narratives that satisfy both sophisticated readers and the rigorous "Information Gain" requirements of modern search algorithms.

"We are entering a period where 'content' is cheap, but 'authority' is expensive," said a spokesperson for AuthorTune. "Our Narrative Mapping process ensures that every manuscript serves as a definitive anchor for an author's career, providing a level of emotional intelligence that technology cannot simulate."

The initiative introduces three key pillars:

- **Insight Extraction:** A collaborative process identifying an author's unique "Edge" to ensure high Information Gain.
- **Entity-Based Structuring:** Aligning book architecture with "Answer Engine" requirements to ensure authors are cited in AI search results.

- **Bespoke Editorial Craft:** A multi-tier refinement process prioritizing a "Royal Luxury" tone.

This launch reinforces AuthorTune's "Human-First" manifesto, positioning the agency as a sanctuary for CEOs and innovators who refuse to compromise on the integrity of their written voice.
