

EshipJet Strengthens SAP Logistics Ecosystem with Certified Partnership and AI-Powered Shipping Innovation

EshipJet's certified SAP partner status reflects its commitment to smarter shipping for SAP users. With ShipperCopilot, businesses can automate shipping, optimize carrier choices, and gain better visibility into logistics operations.

Plano, Texas Apr 19, 2026 ([Issuewire.com](https://www.issuewire.com)) - EshipJet Software, a leading provider of intelligent multi-carrier shipping solutions, proudly announces its recognition as a [Certified SAP Partner](#), reinforcing its commitment to delivering seamless, secure, and innovative logistics technology for businesses operating within the SAP ecosystem.

As global supply chains become increasingly complex, organizations require smarter solutions that connect enterprise systems with real-time logistics execution. EshipJet addresses this challenge through its flagship platform, ShipperCopilot, purpose-built to simplify shipping operations with automation, artificial intelligence, and deep SAP integration.

Featured on the SAP Partner Portal

EshipJet's Shipper Copilot solution is featured on the SAP Partner Portal, highlighting its compatibility with SAP technologies and alignment with enterprise standards for performance, reliability, and customer support.

This recognition enables SAP customers to confidently adopt EshipJet's advanced shipping platform to modernize logistics operations, reduce inefficiencies, and improve shipping visibility.

Seamless Integration Across SAP Platforms

ShipperCopilot is designed to integrate directly with leading SAP solutions, allowing organizations to manage shipping workflows within their existing ERP environment. Supported integrations include:

- [SAP S/4HANA Cloud](#) (Public and Private Editions)
- SAP Business One
- SAP Extended Warehouse Management (EWM)

By connecting shipping execution with SAP systems, businesses can automate processes, eliminate manual tasks, and maintain accurate, real-time logistics data across operations.

AI-Powered Shipping Optimization

EshipJet's ShipperCopilot platform brings next-generation intelligence to logistics management with features such as:

- **AI-Driven Rate Shopping** to compare carrier rates and select the most cost-effective service
- **Multi-Carrier Shipping Support** for parcel, LTL, and TL carriers
- **Automated Shipping Label Generation** for faster fulfillment
- **Real-Time Tracking and Shipment Visibility**

These capabilities help businesses lower transportation costs, improve on-time delivery performance, and enhance customer satisfaction.

Enterprise-Grade Security and Compliance

EshipJet maintains the highest standards of security and operational excellence. The platform is **SOC 2 Type II certified**, demonstrating a strong commitment to:

- Data security
- System reliability
- Compliance readiness
- Operational integrity

This certification provides customers with confidence that sensitive shipping and logistics data are managed in a secure and compliant environment.

Accelerating Innovation for SAP Users

As a trusted SAP partner, EshipJet remains focused on helping organizations unlock greater value from their ERP investments by embedding intelligent shipping capabilities directly into SAP workflows.

With ShipperCopilot, companies can simplify complex shipping operations, improve carrier management, and gain end-to-end logistics visibility—all from within the SAP ecosystem.
