

From Village Soil to National Spotlight: How Kama Organic is Transforming Farming in India

“SKOCH ORDER-OF-MERIT” FOR TOP-30 EVERGREEN IN INDIA”

Gandhinagar, Gujarat Apr 3, 2026 (Issuewire.com) - From Village Soil to National Spotlight: How Kama Organic is Transforming Farming in India

Kama International Organic Pvt Ltd, a Gandhinagar-based certified organic fertilizer manufacturer recognized at the **G20 Summit 2023, FICCI Agri Startup Awards 2025 and the Asia International**

Golden Award for Sustainable Agri Leadership, today announced the full launch of its [direct-to-consumer platform](#) at kamaorganic.com, offering 27+ [certified organic bio-fertilizers](#), fungicides, insecticides and soil health organic solutions to farmers across India, with free delivery across Gujarat and pan-India shipping.

With over a combined decade of experience in agri-chemistry and organic farming research, the company was founded in 2022 by two brothers, **Dr. Palkesh Patel** and **Dr. Haresh Patel**, with one mission: to make Indian farmers independent from costly chemical inputs and to restore the natural health of the soil.

Growing up in the village of Sabar Kantha, Gujarat, the Patel brothers watched the land they once knew as fertile and full of life, gradually becoming tired and depleted because of heavy chemical farming. Instead of turning away from reality, they chose to return to their roots and restore what was being lost. Dr. Palkesh Patel, after a career with leading international agrochemical companies, had seen from the inside how modern agricultural systems operated. His brother, Dr. Haresh Patel, brought ground-level farming knowledge and an unshakeable belief that the answer is not in laboratories alone, but in the intelligence already present in healthy soil.

Two Brothers on an Organic Farming Mission

In 2022, the two brothers founded Kama International Organic Private Limited in Gandhinagar, Gujarat, with a mission to become a world-class center of excellence in Agri-business, built on grassroots research in natural organic farming to help farmers yield better results without poisoning the soil with chemicals.

“We did not start Kama Organic as a business; we started it as a responsibility, towards the soil, our farmers, and future generations. We wanted to create something which helps Mother Earth breathe again, so our children can grow up eating healthy and chemical-free food.”

- Dr. Palkesh Patel, Managing Director, Kama International Organic Pvt Ltd.

From Struggle to Trust

What started as hesitation slowly turned into belief. With tireless efforts and dedication, they created not just a network of farmers but a growing community who believe in them. Farmers who had initially doubted became the company's most credible voice — telling their neighbours what no brochure could: that these products worked, season after season.

Today, **Kama International Organic Pvt Ltd** has built not merely a customer base, but a growing community of farmers who believe in a different way of toxin-free organic farming — one that improves yield, protects certification status for export-quality produce, and restores the biological life of the soil for the next generation.

Recognition at National and International Levels

● **National Achievement Award for Best Startup Innovator (GAUTECH Expo 2026)** — Honored for innovation in organic and agri-tech solutions
