

Gaddiel Launches Advanced ZX Model Nurse Call System for Hospitals

Ghaziabad, Uttar Pradesh Apr 27, 2026 ([IssueWire.com](https://www.issuewire.com)) - Gaddiel Industries proudly introduces the official launch of its latest high-end revolutionary product, ZX Model Nurse Call System which is an innovative next-gen healthcare communication solutions designed to transform patient care, safety and hospital efficiencies. This one-of-a-kind system has a unique design and patent, making it unrivaled in the health care technology market as it is exclusively manufactured by Gaddiel Industries.

The release of this ultra-modern Nurse Call System is a real step forward into modern day patient care infrastructure, as hospitals and healthcare facilities continue to lean towards ever smarter and ever faster communication systems that are reliable.

Revolutionizing Patient-Nurse Communication

Due to the intense speed of healthcare today, real-time communication is paramount. Modern techniques, such as installing a Nurse Call System can help patients contact the caregivers immediately which means they get help soon and hence better clinical output.

This principle at its core is what has led to the development of the ZX Model Nurse Call System—intelligent, responsive, and easy-to-use technology that distances itself from traditional analog systems while creating a communication bridge between patients and medical staff.

This is not just an enhancement; this system has fundamentally changed the way Hospitals run communication, emergencies, and patient engagement.

What Makes the ZX Model Nurse Call System Unique?

The ZX Model Nurse Call System stands out as a proprietary and exclusive innovation from Gaddiel Industries. This model stands out from the conventional ones, which exist in the market, as it supports advanced features and adapts very aptly with modern-day hospitals, ICUs and multi-speciality healthcare facilities.

Please keep in mind that this model is only built by and sold through Gaddiel Industries so note the authenticity, quality assurance and lifetime support.

Advanced Features of the ZX Model Nurse Call System

This new system comes with many powerful features to improve patient experience as well as hospital procedures:

Multi-Function Bedside Unit

The system includes an advanced bedside unit with multiple call options such as CALL, ADDITIONAL HELP, CODE BLUE, and CLEAR, allowing patients and staff to communicate different levels of urgency effectively.

Large Alphanumeric Display

A large five-digit LCD screen allows visible alerts, enabling health care workers to determine the caller for more rapid response.

Ergonomic Patient Handset

The ZX Model includes a simple to use, remote-style patient handset, making it much easier for all patients including the elderly and critically ill to access.

Hygienic and Durable Design

The fact that it is equipped with membrane-type buttons makes the system more hygienic, long-lasting and safe to operate on-dream use areas such as medical environments.

Intelligent Call Acknowledgement System

It provides instant recognition of patient calls, so no request goes missing and the patients are assured that help is within reach.

NABH-Compliant Code Blue Emergency Feature

With the addition of Code Blue emergency alert system for immediate response in critical situations, this facility is expected to improve patient safety and emergency management.

Enhanced Visual Feedback

Patients feel more confident as their visual indications are processed better, all while staff in health care can manage multiple calls if the ZX Model is leveraged in this way.

Designed for Modern Healthcare Infrastructure

Innovatively designed to manage the changing requirements of modern healthcare facilities, the [ZX Model Nurse Call System](#) is one such solution. The system provides a seamless communication and operational framework from general wards to intensive care units.

Delayed response time, lack of communication and increased patient expectation are the major challenges that healthcare providers face. The ZX Model offsets those shortcomings and offers:

- Faster response coordination
- Improved workflow management
- Better prioritization of emergency cases
- Enhanced patient satisfaction

This advanced Nurse Call System will greatly enhance care delivery and operational performance; hospitals can maintain this healthcare solution to attain these benefits.

Improving Patient Safety and Satisfaction

As a nurse call system forms an important part in providing safety and recovery of the patients. Timely assistance is an essential aspect of the hospital experience, with poor performance in this area leading to a negative impact on experience and outcomes.

ZX Model Nurse Call System instantly connects patients to care and tells healthcare professionals when

they have time to respond and how best to do so. This results in:

- Reduced waiting times
- Increased patient confidence
- Better monitoring of critical situations
- Enhanced overall care quality
- Based on Trust and Experience

Gaddiel Industries is very well known for its experience and technical expertise in the healthcare technology sector. Its nurse call systems are proven in many hospitals and health care facilities that appreciate their reliability, scalability and low maintenance.

Continuing on this principle, the ZX Model features a solid wired infrastructure that can operate seamlessly in demanding environments.

Seamless Integration and Scalability

And ZX Model [Nurse Call System](#) is meant to easily work along existing hospital hardware. Ideal for small clinics to large multi-specialty hospitals, it is also scalable in nature.

Furthermore, not all healthcare IT systems coexist neatly with other systems and therefore its integration supports future enhancements in digital monitor, automated workflow management and centralized communication management.

Exclusivity That Ensures Quality

The exclusivity of the ZX Model is one of its most intriguing features. Customers gain from it as its only sold through Gaddiel Industries due to:

- Direct manufacturer support
- Customized solutions
- Guaranteed product authenticity
- Long-term service and maintenance

By removing middle-men, this goes right to the source and is far more trustworthy.

A Step Toward Smarter Healthcare

The introduction of the ZX Model Nurse Call System is a manifestation of Gaddiel Industries' vision to advance healthcare through ingenuity in product design. The advent of smart technologies in hospitals is on the rise with solutions like ZX Model being pivotal in moulding future patient care.

In more — it is not only a method of communication but THE solution that increases safety and

efficiency, as well as patient engagement.

About Gaddiel Industries

Advanced Nurse Call System technologies of healthcare communication solutions provider Gaddiel Industries. The company maintains the focus on innovation, quality and customer satisfaction to deliver world-class production to cater sector needs.

Conclusion

With the launch of the ZX Model Nurse Call System, Gaddiel Industries has introduced a powerful and exclusive solution that redefines hospital communication. Combining advanced features, intelligent design, and unmatched reliability, this innovative Nurse Call System is set to become a preferred choice for healthcare providers seeking excellence in patient care.
