

GLI Epoxy Flooring Now Offers Free Quotes to Homeowners and Businesses Across North York and the Greater Toronto Area

North York-based epoxy flooring contractor removes cost barriers by offering no-obligation quotes to GTA clients.

North York, Ontario May 1, 2026 (IssueWire.com) - [GLI Epoxy Flooring](#), a flooring contractor based in North York, Ontario, has announced that it is offering free, no-obligation quotes to residential and commercial clients throughout North York and the broader Greater Toronto Area (GTA). The move, effective immediately, is intended to make professional epoxy flooring services more accessible to property owners who want clear pricing information before committing to a project.

Epoxy flooring is a surface coating system in which resin and hardener are combined to create a rigid, seamless layer applied directly over concrete or other existing substrates. The finished surface is known for its resistance to stains, chemicals, moisture, and heavy foot or vehicle traffic. Because of these properties, epoxy floors are commonly installed in residential garages, basement recreation rooms, commercial kitchens, retail showrooms, and light industrial facilities. While the material has become

increasingly popular across the GTA in recent years, many property owners put off flooring upgrades simply because they have no clear sense of what a project will cost before speaking with a contractor.

GLI Epoxy Flooring's free quote program is designed to close that information gap. A company representative will conduct an assessment of the space, evaluate the current condition of the concrete surface, and provide a written cost estimate that outlines the full scope of the project. The estimate includes materials, surface preparation work, labor, and the projected timeline. Clients are not required to proceed with any work after receiving the quote.

"Many clients come to us not knowing where to start or what a fair price looks like for their space," said Vince Gucciardi, owner at GLI Epoxy Flooring. "By offering a free quote, we give property owners the information they need to make a confident decision, without any pressure or upfront cost. Our goal is to be transparent from the very first conversation, so that clients feel informed rather than overwhelmed when they are considering a flooring project."

The company offers several types of epoxy flooring systems, each suited to different functional and aesthetic requirements. Solid color coatings provide a clean, uniform finish and are commonly selected for commercial or industrial environments where visual simplicity and easy maintenance are priorities. [Flake or chip systems](#) incorporate decorative vinyl flakes into the coating, creating a textured surface that helps conceal minor imperfections and adds slip resistance. Metallic epoxy finishes use pigment blended into the resin to produce a layered, reflective appearance that has become a popular choice for residential showrooms, salons, and upscale commercial interiors.

In addition to epoxy-based products, [GLI Epoxy Flooring](#) also installs polyaspartic topcoats. Polyaspartic coatings are a category of floor finish that cures significantly faster than standard epoxy, often within a single day, which makes them a practical option for commercial clients who need to minimize the time a space is out of service. They also offer strong resistance to ultraviolet light, meaning they are less likely to yellow or discolor over time when exposed to sunlight.

The free quote service is available to property owners throughout North York, Etobicoke, Scarborough, Mississauga, Brampton, Vaughan, Richmond Hill, and other communities within the GTA. Clients can request a quote by visiting the company's website at <https://gli epoxy flooring.com/> or by reaching out to the GLI team directly by phone.

GLI Epoxy Flooring emphasizes that accurate pricing for a flooring project depends on several factors that vary from one property to the next. The square footage of the area to be coated, the current state of the concrete slab, whether any cracks or surface damage need to be repaired before coating is applied, and the type of finish the client selects all influence the final cost. Providing a general price estimate without accounting for these variables would not give clients a realistic picture of their project. The on-site or detailed consultation model allows the company to provide figures that reflect the actual scope of each individual job.

The announcement comes at a time when interest in residential flooring upgrades across the GTA has remained steady. Home renovation activity in the region has been sustained by a combination of aging housing stock, increased time spent at home, and a broader interest among property owners in improving the functionality and appearance of underutilized spaces such as garages and basements. For commercial clients, epoxy flooring remains an attractive option because of its long service life and relatively low maintenance requirements compared to other flooring categories.

GLI Epoxy Flooring is currently accepting new project inquiries from both residential and commercial

clients. Property owners across North York and the GTA who are considering a flooring upgrade are encouraged to contact the company to arrange their complimentary consultation at no obligation.
