

## Hoffee Announces Design and Precision Upgrades to Signature Glass Oil Spray Bottle

**Jiangmen, Guangdong Apr 14, 2026 ([Issuewire.com](https://www.issuewire.com))** - Jiangmen Hoffee Houseware Company Ltd., a professional manufacturer and exporter of premium stainless steel household products based in the industrial hub of Jiangmen, Guangdong, has officially announced a series of technical and design upgrades to its signature glass oil spray bottle. These enhancements are part of the company's 2026 strategic initiative to refine its kitchenware line through precision engineering and market-driven innovation.

Since its establishment in 2017, Jiangmen Hoffee Houseware Company Ltd. has focused on the intersection of functionality and high-quality manufacturing. The latest iteration of the glass oil spray bottle represents a significant step in the company's mission to provide reliable, food-grade essentials for the global B2B market, including importers, wholesalers, and retail brand owners.

### **Engineering Improvements and Technical Specifications**

The recent upgrades to the glass oil spray bottle focus on solving common pain points identified through long-term market analysis. The primary technical advancement is the integration of an **extended**

**nozzle design.** This precision-engineered component is designed to optimize the atomization process of oils. By extending the nozzle further from the housing, the design prevents oil mist from accumulating around the stainless steel rim. This adjustment effectively reduces drips and residue buildup, ensuring the exterior of the bottle remains clean and hygienic over extended periods of use.

Structural durability has also been a focal point of this update. While the bottle maintains its standard **100ml capacity**—a size favored for its ergonomics and portability—the glass body has undergone a material reinforcement process. The new design features a **thicker, concave base**. This modification serves two critical technical purposes:

**Enhanced Impact Resistance:** The reinforced base increases the bottle's tolerance to physical shock, a vital factor for durability during international shipping and high-frequency kitchen use.

**Thermal Insulation:** The concave architecture provides better separation from surface temperatures. This serves as a protective barrier, helping to preserve the chemical stability and quality of the oil stored inside by minimizing heat transfer from kitchen surfaces.

### Quality Control and High-Volume Manufacturing

Jiangmen Hoffee Houseware Company Ltd. operates with a philosophy that emphasizes consistent quality over mere quantity. Currently, the upgraded glass oil spray bottles are in high-volume production at the company's Jiangmen facility. To maintain the integrity of each shipment, the company has implemented a multi-tiered quality control (QC) protocol.

Every production batch is subject to on-site unpacking inspections conducted by dedicated QC supervisors. These inspections cover several critical performance indicators, including the consistency of the spray pattern, the seal integrity of the stainless steel cap, and the clarity of the glass body. This rigorous oversight ensures that every unit dispatched to international warehouses meets the technical specifications required for consumer safety and brand reputation.

For B2B partners, these stringent manufacturing standards are intended to translate directly into lower return rates and reduced customer complaints. By addressing potential failure points at the manufacturing stage, Jiangmen Hoffee Houseware Company Ltd. aims to provide a more stable product lifecycle for its global distributors.

### Customization and OEM/ODM Services

Recognizing the diverse needs of different market channels—ranging from high-end retail and supermarkets to specialized foodservice providers—the company has expanded its customization capabilities. Jiangmen Hoffee Houseware Company Ltd. provides comprehensive OEM and ODM services that allow partners to align the product with their specific brand identities.

The customization suite includes several advanced branding techniques:

**Laser Engraving:** For high-precision, permanent branding on stainless steel components.

**Screen Printing:** Allowing for vibrant, multi-color logos and designs on the glass surface.

**Embossing:** Providing a tactile, premium branding option for specific product elements.

Beyond the product itself, the company offers tailored packaging solutions. This includes retail-ready packaging designed for shelf appeal, as well as reinforced master cartons specifically engineered for the rigors of e-commerce fulfillment. These logistics-focused packaging designs are intended to minimize transit damage and streamline the "last mile" delivery process for online retailers.

### **Strategic Role in the Jiangmen Household Industry**

As a specialized manufacturer in the Jiangmen region, Jiangmen Hoffee Houseware Company Ltd. leverages the local industrial infrastructure to maintain a competitive edge in stainless steel production. The company's portfolio extends beyond oil sprayers to include a wide array of premium bar tools, coffee accessories, and general kitchenware.

The 2026 upgrades to the signature glass oil spray bottle reflect a broader trend within the company to move toward "smart manufacturing" principles—where product design is continuously iterated based on real-world performance data. This approach has allowed the company to grow from a 2017 startup into a recognized exporter capable of meeting the demands of high-volume international contracts.

The company's facility is equipped to handle the complexities of large-scale production while maintaining the flexibility to accommodate boutique orders with specific branding requirements. This dual capability makes Jiangmen Hoffee Houseware Company Ltd. a versatile partner in the global houseware supply chain.

### **Commitment to Long-Term Partnerships**

The announcement of these design upgrades is also an invitation to global procurement professionals to explore the company's broader range of stainless steel and glass products. The company's focus remains on "Service that makes collaboration seamless," emphasizing clear communication, transparent production timelines, and reliable execution.

By integrating innovative design with robust manufacturing protocols, Jiangmen Hoffee Houseware Company Ltd. continues to position itself as a leading provider of functional home essentials. The updated glass oil spray bottle is now available for bulk ordering, with the company offering samples to interested B2B partners to demonstrate the efficacy of the new nozzle and reinforced base designs.

### **About Jiangmen Hoffee Houseware Company Ltd.**

Located in Jiangmen, Guangdong, China, Jiangmen Hoffee Houseware Company Ltd. is a professional manufacturer and exporter specializing in premium stainless steel and glass household products. Established in 2017, the company is dedicated to the production of high-quality, innovative, and functional home essentials. Its product categories include professional bar tools, specialty coffee accessories, and modern kitchenware. With a strong emphasis on quality control and customizable manufacturing solutions, the company serves a global clientele across multiple retail and hospitality sectors.
