

## iBluu Secures Strategic Mandates to Enable Joint Ventures for 3500 MW Solar Portfolio Across India

iBluu Consulting Venture engages global and domestic partners to structure capital, and lead partner onboarding across joint ventures, consortium models, and equity participation—unlocking high-return opportunities in PPA-backed renewable assets.

**Noida, Uttar Pradesh Apr 17, 2026 ([IssueWire.com](https://www.issuewire.com))** - In a significant development within India's rapidly expanding renewable energy landscape, a leading solar energy platform with an existing pipeline of over **3500 MW under Power Purchase Agreement (PPA) structures** is actively exploring

strategic partnerships to accelerate execution across multiple states.

The company, with projects spanning key high-growth solar markets in India, is now seeking to onboard **joint venture partners, consortium participants, and strategic investors** to unlock scale, optimize capital deployment, and fast-track project delivery timelines.

### **Strategic Mandate and Market Context**

Amid rising demand for clean energy and increasing policy momentum toward renewable capacity expansion, the ability to **structure capital, execute projects efficiently, and align with institutional partners** has become a defining differentiator in the sector.

In this context, **iBluu Consulting Venture Private Limited (iBCV), a venture of iBluu Corporations**, has secured **back-to-back strategic advisory mandates** to support the identification, structuring, and onboarding of suitable partners for these projects.

iBCV's role extends beyond conventional advisory—positioning itself as a **strategic bridge between project developers, global capital, and execution ecosystems**.

### **Partnership Models Under Consideration**

The mandate encompasses a flexible and multi-structured approach to partnership, reflecting evolving investor preferences and capital strategies.

#### **Key engagement models include:**

- Joint ventures with domestic and international energy companies
- Consortium-based project participation
- Strategic equity investment at project level
- Structured funding solutions aligned with high-return profiles
- Alternative capital frameworks tailored to investor risk appetite

This multi-layered approach enables **alignment across capital providers, developers, and execution partners**, ensuring both scalability and financial viability.

### **A Scale Opportunity in India's Energy Transition**

India's renewable energy ambitions continue to create **large-scale, execution-ready opportunities**, particularly in solar infrastructure. With a strong policy backbone and increasing demand for clean power, the sector is witnessing a shift from **capacity announcements to execution acceleration**.

The 3500 MW portfolio represents not just project capacity, but a **platform-level opportunity** for partners seeking:

- Long-term contracted revenue visibility under PPA structures
- Exposure to India's high-growth renewable energy market
- Participation in scalable, multi-location infrastructure assets

### **iBCV's Strategic Role**

At the center of this engagement is **iBluu Consulting Venture Private Limited (iBCV)**, a venture of **iBluu Corporations**—the group’s strategic advisory platform focused on **investment consulting, partnership structuring, and institutional engagement**.

Through this mandate, iBCV is:

- Identifying aligned domestic and international partners
- Structuring transaction frameworks for optimal capital deployment
- Facilitating negotiations and strategic alignment
- Ensuring execution readiness across stakeholders

The firm’s approach reflects a broader shift in consulting—from advisory to **execution-oriented strategic enablement**.

### **Unlocking the Next Phase of Renewable Growth**

As India moves toward its long-term renewable energy targets, the focus is increasingly shifting toward **execution scale, capital efficiency, and partnership ecosystems**.

This mandate signals a growing recognition that **large-scale energy transformation requires not just capital—but coordinated strategic alignment across multiple stakeholders**.

### **About iBluu Corporations**

iBluu Corporations is a multi-sector strategic platform operating across advisory, investment consulting, and institutional engagement.

Through **iBluu Consulting Venture Private Limited (iBCV)**, a venture of **iBluu Corporations**, the firm delivers integrated solutions spanning **business strategy, renewable energy advisory, investment structuring, and partnership development**, enabling global and domestic stakeholders to participate effectively in India’s evolving infrastructure and private markets landscape.

### **Closing Note**

In a sector defined by ambition, the true differentiator is execution.

With 3500 MW of solar capacity poised for strategic collaboration, the opportunity is no longer about entry—it is about **alignment, scale, and speed**.

**iBluu SECURES BACK-TO-BACK STRATEGIC MANDATES: JOINT VENTURES FOR 3500 MW SOLAR PORTFOLIO ACROSS INDIA**

The infographic is divided into three main sections:

- 1 - PPA MODEL (OPERATIONAL PARTNERSHIP):**
  - Long-Term PPA for IBLU & Revenue Stability
  - Performance Guarantees & Operational Efficiency
  - Long-Term Contract
  - Value Creation conceptual
  - Output conceptual
  - Risk Expansion conceptual
- 2 - EPC MODEL (CONSTRUCTION & ACQUISITION):**
  - High upfront Capital & Procurement Volatility (vs. Market price)
  - Schedule & EPC Contractor Management
  - RR Portfolio
- 3 - INDIA STRATEGIC COMPARISON & ALTERNATIVE:**
  - Direct Comparison: Operational Cash Flow vs. Capital Acquisition
  - Graphs showing EPC vs PPA costs: EPC (\$16-18M), PPA (\$2.5M)
  - Market Growth: \$2.5B+
  - Market Growth: \$2.5B+
  - Market Growth: \$2.5B+

Additional elements include: Geopolitical risks, Disrupted Development, PPA Model Development Cycle, EPC Path (Construction), Construction Flow (EPC), PPA Model - Operate Short-Term capital & Acquisition of Asset, Fixed Tariffs (TLUs) - IBLU Provider (Asset Owner), Sovereign-backed Contracts, Performance Flow (PPA), Renewable Certificates (REC) & CARBON CREDITS, and Grid Connectivity & Distribution.

Key points at the bottom:
 

- Transitioning from Global Risk to Domestic Stability
- Key policy incentives driving localized energy ecosystems
