

Leads Monkey Unveils Verified Google Workspace Partner Pricing for 2026, Saving Businesses Up to 64%

Certified Google Cloud Partner replaces expired promo codes with permanent wholesale rates starting at \$3 per user, free professional setup, and 24/7 support no contracts required for qualifying teams of 15+ users.

New York City, New York Apr 28, 2026 (Issuewire.com) - Leads Monkey, a [certified Google Cloud Partner](#), today announced the expansion of its Google Workspace Partner Pricing Program for 2026, providing small and medium-sized businesses with permanent wholesale rates that save up to 64% compared to standard Google Workspace pricing. The program directly addresses widespread frustration among business owners who have discovered that most online "Google Workspace promo codes" are either expired, restricted to enterprise customers, or limited to minor first-year discounts that vanish after twelve months.

Through the program, accessible via verification code PARTNER2026, qualifying teams of 15 or more users can secure Business Starter plans at \$3 per user per month (compared to Google's \$8), Business Standard at \$13 (compared to \$17), and Business Plus at \$20 (compared to \$26). Unlike traditional promotional codes, this pricing is locked in permanently rather than expiring after the first year.

Addressing a Market Gap

"Businesses are tired of chasing promo codes that expired months ago or deliver minimal first-month

discounts," said Waqas Ahmad, Founder of Leads Monkey. "Our partner program offers what temporary codes cannot permanent wholesale pricing, professional setup at no cost, and dedicated 24/7 expert support. Customers receive the identical Google Workspace product, including Gmail, Drive, Meet, and the same 99.9% uptime guarantee, at significantly reduced rates."

A recent audit conducted by Leads Monkey tested popular promo codes circulating online, including WORKSPACE15, GOOGLE20OFF, SAVE2026, and GWORKSPACE. All were found to be expired, discontinued, or limited exclusively to enterprise accounts of 300 or more users.

What Is Included

The Partner Pricing Program includes complete technical setup typically valued between \$500 and \$2,000, provided at no additional cost. Services cover domain verification, DNS configuration including SPF, DKIM, DMARC, and MX records, user account provisioning, two-factor authentication, mobile device configuration, and full migration assistance. Accounts are deployed on USA-based IP infrastructure with established sender reputations to maximize email deliverability.

Customers retain 100 percent ownership and full administrative control of their accounts. Leads Monkey retains zero access following the standard 24 to 48 hour setup period.

Pricing Transparency and Flexibility

The program operates without long-term contracts. Customers may cancel with 30 days' notice and export all data at any time. Accounts that scale beyond 200 users automatically receive reduced rates of \$2.50 per user per month. Annual billing provides an additional 5 percent discount on all plans.
