

Local Coconut Tree Climbing Service Brings Professional Services to Estate Owners Across Sri Lanka

Island-wide service offers, trained, insured climbers and managed harvest schedules to coconut estate owners tired of unreliable casual labor

Colombo, Sri Lanka May 27, 2026 ([IssueWire.com](https://www.issuewire.com)) - A professional coconut tree climbing service in Sri Lanka named [Coconut Tree Climbers](#) is announcing its availability to estate owners across Sri Lanka today.

They are offering a fully managed harvesting solution that replaces the uncertainty of casual labor with trained crews, fixed schedules, and written harvest reports after every visit.

The business was founded in response to a problem that thousands of coconut estate owners across the island face every season - the near-impossible task of finding skilled climbers who show up when they say they will, work safely at height, and return reliably the following month.

The new service is designed to solve that problem completely.

"Estate owners have been managing this frustration for decades," said a spokesperson for the company. "They call someone, wait, follow up, wait again, and sometimes the crew never comes at all. Meanwhile the coconuts are overripe, dropping, and the season's yield is already down. We built this service because that shouldn't be normal."

Unlike casual labor arrangements, the company operates on a structured model. Each estate is assessed individually, assigned a dedicated crew, and placed on a recurring harvest cycle tailored to

the size and needs of the land. Following every visit, estate owners receive a detailed report covering the number of palms climbed, total yield collected, and any observations on palm health.

All climbers employed by the service are professionally trained and covered under the company's own insurance policy, removing any liability from the estate owner in the event of an incident on their property.

The service is available island-wide, with the company committing to reach any estate within 48 hours of an initial enquiry at no additional charge for travel or distance. Coverage includes all major coconut-growing regions, among them Kurunegala, Puttalam, Gampaha, Galle, and Matara.

Estate owners can book an initial assessment free of charge.
