

# Mazurly Launches as the All-in-One Resource Hub for Digital Nomads, Remote Workers, and Online Entrepreneurs

The platform offers free tools, curated guides, and practical resources for people building location-independent businesses and lifestyles

**L-Iklin, Valletta Apr 5, 2026 ([IssueWire.com](https://www.issuewire.com))** - Mazurly Launches Free All-in-One Platform for Digital Nomads — Covering Visas, Cost of Living, Invoicing, and Remote Work Tools

Malta — Mazurly ([mazurly.com](https://mazurly.com)) has officially launched as a comprehensive resource platform built specifically for digital nomads, remote workers, and online entrepreneurs who want to travel smarter, work more efficiently, and grow their businesses from anywhere in the world.

At a time when remote work has gone from trend to lifestyle for millions of professionals globally, Mazurly fills a gap that has frustrated this community for years: the information they need is scattered across dozens of different websites, tools require expensive subscriptions, and most resources are built for tourists rather than people planning extended stays or relocations.

Mazurly consolidates everything into one free platform.

— FREE TOOLS —

Mazurly offers four free tools designed for daily use by remote professionals:

[Travel Visa Requirements Finder](#) — Instantly look up visa requirements for any nationality traveling to

any country. No paywalls, no signup required.

[Free Invoice Generator](#) — A clean, professional invoicing tool built for freelancers and independent contractors. Create, customize, and download invoices in seconds — one of the most capable free invoice tools available online.

Free Time Converter — Built for teams and freelancers spread across multiple time zones, making scheduling across borders effortless.

[Free Bulk Email Blocker](#) — A unique tool that lets users clean up their inbox by blocking multiple senders at once — a time-saver for anyone managing high email volume.

All tools are available at [mazurly.com/tools](https://mazurly.com/tools) with no account required.

### — COST OF LIVING GUIDES: REAL DATA FOR REAL DECISIONS —

One of Mazurly's flagship features is its growing Cost of Living section — a destination-by-destination breakdown covering 40+ cities and expanding. Unlike generic travel blogs, Mazurly's guides are built for people making real financial decisions: whether to relocate, plan an extended stay, or simply understand what their monthly budget will look like on the ground.

Each guide covers rent, food, transport, and lifestyle costs, alongside FAQs that answer the practical questions expats and nomads actually ask — from average co-working costs to what a comfortable life realistically costs per month. Current coverage spans popular nomad hubs in Thailand (Chiang Mai, Bangkok, Phuket), Portugal (Lisbon, Porto, Braga, Faro), Malta (Valletta, Sliema), the Philippines, and more — with new destinations added regularly.

Click here to find the [cost of Living directory](#).

### — GUIDES AND CONTENT FOR REMOTE PROFESSIONALS —

Beyond tools, Mazurly publishes in-depth guides across three core areas: Travel (visas, banking, insurance, eSIMs), Work (deep focus systems, automation, productivity tools), and Build (marketing, growth, monetization for online businesses). The platform's blog and dedicated guide sections are designed to give remote professionals actionable knowledge rather than surface-level tips.

### — WHAT'S NEXT —

Mazurly is currently free and expanding rapidly. A SaaS product offering is in development for later this year, designed to give remote professionals and businesses deeper functionality built on top of the platform's existing tools and data.

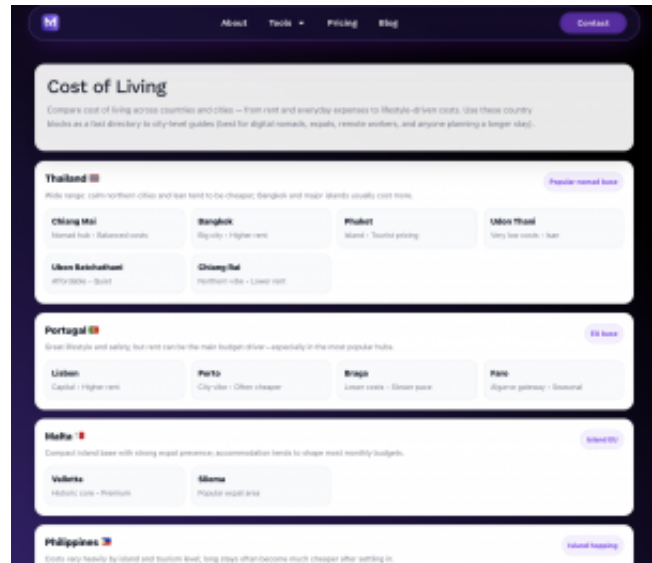

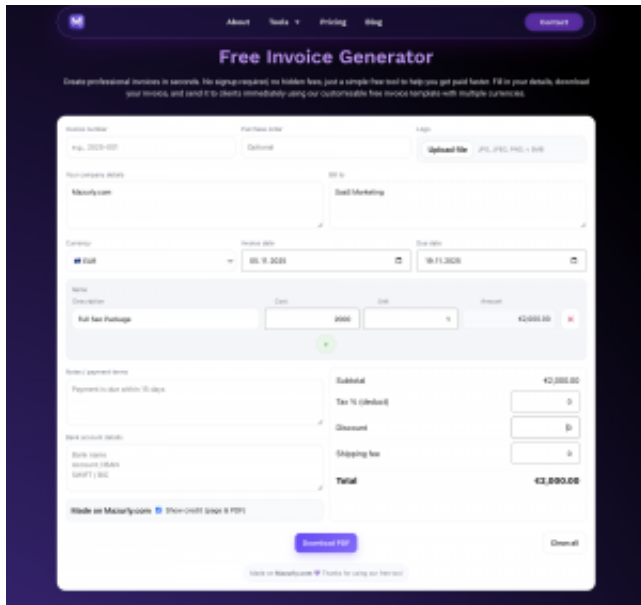

It will always promote free resources and guidance for digital nomads, remote workers, and online entrepreneurs with free practical tools, cost of living guides, and in-depth content across travel, productivity, and online business growth. Founded by Maria Mazur entrepreneur based in Malta. Mazurly is built for people who live and work location-independently.
