## Noida, Uttar Pradesh Apr 17, 2026 ([IssueWire.com](https://www.issuewire.com)) - PlaceTie Reports Training of Over 5,000 Students and Expands Operations Across India and the US

PlaceTie, an online skill development and training platform, has announced that it has trained over 5,000 students across India while maintaining a reported placement rate of over 90%. The company continues to expand its reach through online programs and placement support across multiple cities.

Founded by Vishwajeet Kumar, PlaceTie focuses on providing training in Digital Marketing, Human Resources (HR), Business Analysis, and Data Analytics. All programs are delivered in an online format, allowing students from different parts of the country to access the training.

The platform combines skill-based learning with placement support services, including resume building, mock interviews, and interview opportunities with hiring partners. This approach is aimed at preparing candidates for job roles in relevant industries.

According to the company, one of the key challenges faced by students is the gap between academic learning and industry requirements. PlaceTie's training model is designed to address this gap by focusing on practical exposure and job readiness.

“Our focus is on ensuring that students are prepared for real job opportunities after completing their training,” said Vishwajeet Kumar, Founder of PlaceTie.

PlaceTie operates on a Pan India model, offering online training programs and facilitating placements

across different cities based on candidate profiles and job requirements.

The company has also initiated its expansion into international markets, including the United States, as part of its growth strategy.
