

PlantGift.eu Expands EU-Wide Plant Delivery to 25 Countries with Bulk Landscaping and Indoor Plant Gift Collections

Dublin-based family business PlantGift now delivers premium indoor plants, outdoor landscaping bulk orders, and curated plant gifts for any occasion to 25 European Union countries including Germany, France, Spain, Netherlands, and Italy.

Dublin, Ireland Apr 13, 2026 ([Issuewire.com](https://www.issuewire.com)) - PlantGift.eu, the Irish family-run online plant nursery, has announced the expansion of its European plant delivery service to 25 EU countries, reinforcing its position as one of the most comprehensive online plant retailers operating across the European Union. The expansion includes enhanced bulk ordering capabilities for landscaping professionals and a broadened catalogue of indoor plant gifts suited to every occasion.

The company, which operates from Dublin, Ireland, now ships freshly sourced houseplants, garden plants, landscaping bulk orders, and curated plant gift sets to customers in Germany, France, Spain, the Netherlands, Italy, Belgium, Austria, Portugal, Poland, Sweden, Denmark, Finland, Czech Republic, Romania, Hungary, Greece, Croatia, Slovakia, Slovenia, Lithuania, Latvia, Estonia, Luxembourg, Bulgaria, and Ireland. PlantGift.eu has positioned itself as a go-to destination for customers searching to buy plants online in Europe, whether for personal use, corporate gifting, or large-scale garden and landscaping projects.

"We started as a small family business in Dublin, and the demand from across Europe has been

extraordinary," said a PlantGift spokesperson. "A customer in Berlin can now order 60 Geranium Rozanne plants for a landscaping project, while someone in Paris can send a curated indoor plant gift to a friend for a birthday or housewarming, all from the same trusted source."

PlantGift.eu has built its reputation on a direct-from-nursery supply model. Rather than warehousing inventory, the company partners with specialist growers and nurseries across Ireland and Europe, ensuring that every plant—from tropical foliage and air-purifying varieties to hardy perennials and climbing plants—is freshly sourced and individually inspected before dispatch. Orders are typically shipped within one working day with tracked delivery across all 25 EU markets.

The introduction of enhanced bulk ordering has been particularly significant for the landscaping and commercial sectors. PlantGift.eu now offers bulk packs of groundcover plants, hedging plants, perennials, and ornamental grasses in quantities of 48 to 60 units per order, catering to landscape architects, property developers, garden designers, and municipal projects throughout the European Union. Popular bulk lines include Geranium Macrorrhizum groundcover collections, Hedera Helix Glacier variegated ivy packs, Cornus Sanguinea Midwinter Fire dogwood bundles, and Nepeta Walker's Low catmint trays—all available for EU-wide delivery.

The company's indoor plant gift range has also expanded, with curated plant gift sets designed for birthdays, housewarmings, corporate gifts, sympathy arrangements, and seasonal occasions. PlantGift.eu offers personalised gift messaging alongside premium planters and accessories, providing what the company describes as "the gift that keeps on growing." The service has gained traction among corporate buyers across Europe's major cities seeking meaningful, sustainable alternatives to traditional flower bouquets.

PlantGift.eu's catalogue now exceeds 500 plant varieties spanning air-purifying plants, tropical houseplants, low-maintenance office plants, bedroom and bathroom plants, pollinator-friendly garden plants, citrus trees, climbing plants including Wisteria and Clematis, rare and exotic species, and evergreen hedging substitutes such as Euonymus Green Spire. The breadth of selection, combined with pan-European delivery infrastructure, sets the company apart from competitors limited to single-market operations.

The European online plant market has experienced rapid growth in recent years, driven by increased consumer interest in indoor gardening, biophilic design, and sustainable living across the continent. PlantGift.eu has capitalised on this trend by offering region-specific plant care guidance tailored to the diverse climates found across EU member states—from Mediterranean conditions in Spain and Portugal to Continental climates in Germany and Austria, and Maritime conditions in Ireland, the Netherlands, and Belgium.

Being based within the European Union gives PlantGift.eu a logistical advantage over UK-based competitors, which now face additional phytosanitary requirements and customs complications following Brexit. PlantGift.eu operates entirely within the EU single market, enabling seamless cross-border plant shipping without the regulatory friction that affects non-EU retailers.
