**San Jose, California May 8, 2026** ([IssueWire.com](https://www.IssueWire.com)) - **Decrypt Compliance**, a cybersecurity-focused CPA firm, announced the expansion of its SOC 2 audit and readiness services to support the growing demand among technology companies. The firm, led by Raymond Cheng, continues to gain recognition among the [best SOC 2 auditors in San Jose](#).

SOC 2 compliance has become a critical requirement for SaaS and cloud-based businesses that handle customer data. As organizations scale, they are increasingly expected to demonstrate strong internal controls related to security, availability, and confidentiality.

Decrypt Compliance's expanded services aim to simplify the audit process by combining readiness, implementation, and certification into a structured and efficient workflow. This approach helps companies reduce delays and better prepare for formal audits.

According to the company, its methodology is designed to align with AICPA standards while adapting to the needs of modern technology environments. The firm supports multiple frameworks, including SOC 2 and ISO standards, allowing businesses to streamline compliance efforts.

“Organizations today need compliance partners who understand both regulatory expectations and the pace of innovation,” said Raymond Cheng. “The focus is on helping companies demonstrate trust without slowing their growth.”

Raymond Cheng brings over 10 years of experience in security governance, risk, and compliance. His background includes roles at global organizations such as EY, Salesforce, and Tencent, along with certifications including CPA, CISSP, CISA, and ISO 27001 Lead Auditor.
