New York City, New York Apr 11, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Drakkar TI has announced a major update to **RollD Virtual Dice**, its free mobile dice-rolling app for iOS and Android, introducing a fully enhanced experience shaped by feedback from its international user community.

Designed for tabletop RPG players, board game enthusiasts, and families, Rolld Virtual Dice offers a practical solution for common play situations such as missing physical dice, travel-based gaming, classroom activities, and casual game nights at home or on the go. The updated version focuses on improving speed, usability, and customization while keeping the app simple and accessible for both experienced and casual players.

Rolld Virtual Dice supports standard dice formats including D2, D4, D6, D8, D10, D12, D20, and D100. It also includes a custom dice engine that allows players to create non-standard dice such as D75, modifier calculations ranging from -99 to +99, roll history tracking, alphabetic dice from A to Z, and bulk rolling for combinations such as 50d6 or 20d100.

According to the company, the latest improvements were developed based on real-world usage patterns and suggestions from a growing international audience. Rolld Virtual Dice is already used by more than 85,000 users across 128 countries and is currently available in eight languages: English, Spanish, Portuguese, French, German, Italian, Russian, and Indonesian.

Rather than trying to replace physical dice, the app is positioned as a lightweight and practical digital companion that helps keep gameplay moving when dice are unavailable, forgotten, or inconvenient to use.

“Our goal was to build a tool that adapts to the player, not the other way around,” said Giovanni Linke, Director of Strategy at Drakkar TI. “This enhanced version reflects what we learned from the community. We focused on making the experience faster, more flexible, and more useful across different types of games and real-life situations.”

Rolld Virtual Dice remains free to use and is available now for mobile users on iOS and Android. More information can be found at <https://drakkarti.com/rolld>
