

Scrupp Launches 94 Comparison Pages for LinkedIn Scraping and Email Finding Tools

B2B sales tool Scrupp publishes side-by-side comparisons with Apollo, Evaboot, Hunter, ZoomInfo, PhantomBuster, and 89 other lead-gen platforms.

Los Angeles, California Apr 20, 2026 ([IssueWire.com](https://www.issuewire.com)) - Scrupp, the Chrome extension for LinkedIn and Sales Navigator scraping with verified email enrichment, today announced the launch of 94 head-to-head comparison pages covering virtually every major B2B prospecting tool on the market.

The comparison pages — available at [scrupp.com/vs/\[tool\]](https://scrupp.com/vs/[tool]) — cover direct competitors like Apollo.io, Evaboot, PhantomBuster, Wiza, Lusha, and ZoomInfo, as well as specialized email verification tools like Hunter.io, NeverBounce, ZeroBounce, Bouncer, and Clearout. Each page provides data-driven feature comparisons, pricing breakdowns, data freshness analysis, and honest trade-offs to help sales teams, recruiters, and founders pick the right tool for their workflow.

"Sales teams are drowning in prospecting tools, and most comparison content is written by affiliates chasing keywords, not by people who actually run outbound," said Igor Vorobyov, founder of Scrupp. "We built these 94 pages as an honest reference — including when our competitors are a better fit than we are."

Coverage includes: LinkedIn scraping tools (PhantomBuster, Dripify, Meet Alfred, Waalaxy, HeyReach), B2B contact databases (Apollo, ZoomInfo, Lusha, Cognism, Dealfront, UserGems), email finding and verification (Hunter, Snov.io, Skrapp, Anymail Finder, NeverBounce, ZeroBounce, Bouncer, Clearout), sales engagement platforms (Reply.io, Mailshake, Lemlist, Outreach), and Chrome extensions for prospecting (Evaboot, Wiza, Kaspr).

Each comparison includes pricing side-by-side, data hit rates, integration coverage (HubSpot, Pipedrive, Salesforce, Zapier), compliance notes (GDPR, CCPA, LinkedIn ToS), and workflow screenshots.

About Scrupp: Scrupp is a LinkedIn and Sales Navigator scraper with multi-provider email waterfall enrichment. Used by 2,000+ SDR teams, recruiters, and lead-gen agencies worldwide, Scrupp offers pay-as-you-go pricing (no subscription required), a free Chrome extension, and REST API access. Founded in 2022.
